

“Ey Anto, catch!” Sophie’s voice caused Antonella’s tail to look over and she saw a vial with a liquid flying towards her. Quickly and without turning to face Sophie and Lucy, she moved one of her many hands to catch it in the air.

“Hey, that’s dangerous...! Don’t toss things at me like that...” Antonella replied with her tail, turning to inspect the vial with both heads.

“Woah! That was cool how you caught it in midair,” said Lucy clapping with her and Sophie’s shared lower hands.

“I told you she could do it,” added Sophie.

“That’s what my second head is for... it’s not that hard at all,” said Antonella with her tail.

“It’s still impressive, you looked super cool catching it without turning around,” said Lucy laughingly. Sophie nodded in agreement while Antonella was still distracted looking at the vial. “So, what’s this for? It’s a mutagen, right?”

“We wanted to give you something to have ‘fun’, you know?” Lucy replied, winking and gesturing sexily.

“The last time I drank one of these I ended up fused with you two... isn’t that dangerous?”

“But you went back to normal hours later... they’re tested doses and they’re not dangerous. In fact, here...” Sophie said, searching in the bag where the first vial was and handing her an extra one, “Just in case you want some EXTRA fun...”

Antonella accepted it without complaint and put both doses in her pocket. “How many of these do you have? You’re not abusing the lab’s supply at all, are you?”

The duo shrugged their shoulders. “Maddie makes a lot of these daily for different experiments...”

“Am I part of those experiments now? How many do you two use on yourself?” Antonella asked, crossing all six of her arms.

“Eh...” Lucy said while scratching her cheek, “...let’s say it’s more fun to see others using it,” Sophie finished.

“Then I assume I have to report the results to you two for... ‘scientific reasons’.”

Sophie and Lucy smiled at each other, tilting their heads towards each other. “Noo,” they said in unison.

“When we merged with you, we shared all our memories, remember?” Sophie said.

“We know how much you enjoyed your mutation and how you experimented with your new body when it happened...” Lucy added. Antonella’s two faces blushed as she kept her response to herself, knowing that any argument wouldn’t hold water when Sophie and Lucy saw straight into her memories.

“So don’t be embarrassed, enjoy yourself!” Sophie said, “Take it as a gift from your friends you are sexually attracted to.”

“What?!” Antonella said in a flustered tone.

Lucy winked, gesturing towards her and Sophie’s groin with one hand as she was about to touch herself. “Oh... Sophie... Lucy... you are so sexy,” she moaned, reenacting Antonella’s thoughts from their shared fusion.

“Y-you two had those kinds of thoughts about me too...”

“No one said we didn’t,” Lucy said laughingly. Antonella couldn’t get any redder than she already was. “O-...Okay... I gotta go, it’s late!”

“Enjoy!” both sisters said in unison as they waved to Antonella.

Antonella arrived at her apartment and went inside, taking her coat off and holding the two vials of mutagen in two of her many hands. She hated to admit it, but the excitement of testing the mutagen’s effects made her a little impatient. She had never had the chance to try it out recreationally by herself and alone at home. Now she had not just one, but two doses in her possession which made her arousal skyrocket further.

She immediately headed to her room and posed for a moment in front of the mirror with all six of her arms, smiling with both faces. “I’m already quite extreme as it is... I wonder what effect it will have on me this time.”

She looked down at her arms and moved them, caressing her breasts over her clothes. “I hope it doesn’t take any parts off of me, last time the fusion had four arms and it felt really weird...” she said with her main head, “...although it was really sexy...” she finished with her tail.

She felt her heartbeat speed up the more she thought about it, so she shook her heads and began to take off her clothes until she was completely naked. “Last time Sophie and Lucy drank one dose and I drank another...” she said while looking at the vials and her naked body in the mirror “...that was two doses for three people. Do they even count as two if they have one body?” she asked herself somewhat doubtfully, “Anyways... I think that means I should drink both to have a good effect?”

For a few seconds she considered calling Sophie and Lucy to ask them, but that would imply admitting that she couldn’t resist using the doses when she got home. She shrugged and uncapped both vials, drinking them with both heads at the same time.

“They are recreational and safe doses... what could go wrong?” she stated confidently before taking a step back, losing her balance a little. A sensation ran through her entire body, like an electric wave that started in her main head and moved to her tail head, making all eight of her limbs tremble.

The sensation was way more intense than when she first mutated and Antonella could barely maintain consciousness as she felt her entire body changing and reforming. It was too late to realize that a double dose was too much for her to handle.

"Nnnngg...Ughhh..." "AHH!" Moans and screams escaped from her two mouths as her arms hugged her body. She opened one of her eyes and noticed her six breasts changing shape. At first, she thought they were growing in size, but it was her nipples that opened in half and changed their shape, forming a mouth on each of her breasts.

The six mouths finished forming at once, opening and breathing deep, filling Antonella's lungs in a single instant. "O-Oh my..." she said at the same time with her main head and her new six mouths. Normally she would have focused on controlling her new mouths independently but the changes in her body were still far from over.

Her sides, her hips, and even her neck seemed to reform before her eyes. Her neck subtly shifted to the right while a new neck began to grow on her left. The shock of the change made time run slowly for her, watching in detail as that new neck extended and began to form a new head. Eyes, mouth, nose and hair grew rapidly and took the length of her current hair. Once it finished growing, the new head opened her eyes to give Antonella the perspective of a third pair of eyes.

The first thing her new eyes noticed were the six new protuberances growing behind each of her six arms. She moved her arms forward to watch her new shoulders extend and form elbows, wrists and hands with new fingers that moved at her command. Controlling twelve arms was overwhelming even with her three heads working at full capacity. Being unable to control her entire body was something she hadn't experienced since her first mutation manifested.

"I-I think I made a mistake..." she said with her new head. Her legs wobbled and her hips began to widen, forming a third leg between them as she spoke. Her twelve arms moved erratically in an attempt to balance herself.

As her third leg formed, her new groin moved her tail to the right. Her tail's eyes immediately noticed the new protuberance growing from her new set of hips, forming a new tail that extended and began to form a fourth head.

"You've gotta be kidding me..." she said with her tail by the moment her third and new foot touched the ground, being a combination of a right and left foot. Her fourth head finished growing and looked at the mirror to appreciate her new and extreme form. Her three legs shook as she moved them to adjust to her new balance.

Looking down at her new crotches, she could feel the fresh air on her two vaginas as her twelve hands began to explore her body, now obeying her commands better. She realized immediately that having four brains was as useful as it was overwhelming. Her inner voices and thoughts doubled in number and the sensations in her body were driving her crazy.

"This is... this is so cool...!" she said with her left tail, "I can't believe I have four heads now..." she said with her right tail. She relaxed her twelve arms, feeling them all rubbing against each other, fighting for space and touching her thighs with more fingers than she can count. For a second she felt like she was in an orgy with six girls caressing her skin.

"Hello..." "I can..." "Talk..." "With..." "These..." "Mouths..." she said while taking turns controlling her breast mouths. She smiles with her four heads as she felt like she had

absolute control of her body. After a few seconds she laughed tenderly. "I think with this body I could have two simultaneous conversations with Jessica AND two with Sophie and Lucy."

As she said this her four heads looked at each other "Nah! I think that would be too much..." she said laughingly. Looking back in the mirror she couldn't help but admire her new body, caressing every corner with her many hands, feeling the mouths on her breasts begin to drool and her vaginas getting wet in excitement.

"Mmm... I think I should get more comfortable..." she said with one of her heads as she turned around and slowly used her three legs to get closer to the bed, climbing onto it and turning to lay her back on it and spreading her now fifteen limbs around her. Her tails rose up and looked down at her body. "Maybe using both doses wasn't such a bad idea... where should I start?"

Her three legs unconsciously spread apart as much as they could as if her own body was listening to her, lifting her hips off the bed to expose her two pussies. Both were wetter than they had ever been before, though it wasn't hard to believe considering the overwhelming sensations she was feeling right now.

She turned both heads between her shoulders to look into each other's eyes and began to kiss herself passionately. Immediately and with surprising precision for a newly mutated girl, she moved her twelve hands to push their heads and intensify the kiss, caressing her breasts and putting fingers inside her breast's mouths. There was hardly a corner of her body left unstimulated, except for her genitals.

Her two tails watched the action from above as if they were enjoying a porn movie. The sensation of kissing herself and caressing herself in so many places at once nearly brought her to the edge of orgasm, even without stimulating her pussies.

She noticed how the breathing in both her tails accelerated, and she could see the hot breath coming from all of her mouths. "Gosh... my body... feels too good..." she said while concentrating as much as she could to resist succumbing to orgasms. She slowly moved her tails down, kissing the thighs of her outer legs and then moving up further to kiss her middle thigh, which was so sensitive that it made her moan in pleasure.

Immediately she felt two of his many hands holding her tails heads and pushing them towards her crotches. From two different points of view Antonella saw her two pussies drooling and completely ready to receive her love. Antonella had always enjoyed her body, but now having her pussies doubled and the thought of having two orgasms at the same time was something she wasn't mentally prepared for.

She lowered their two tails to her desperate pussies, using her long tongues to spread the lips of both vaginas. The pleasure coming from both genitals clouded her mind as her tongues made their way inside, rubbing and stimulating every inch of her insides. The length of them made her feel like he could almost reach both of her wombs.

Her two main heads looked down without breaking the kiss, enjoying all the action from another point of view. Seeing her many hands playing with her breasts, her three legs opened and sank their feet into the sheets while she could only see the forehead of her two

tail heads as they kept licking her own pussies. The whole scene was something she will remember for the rest of her life.

Two of their hands, wet with the saliva of their breasts, went between their legs to help her tails in the job as she played with her two clits, increasing the sensations further which was difficult to bear even with four brains.

It didn't take long for her to reach two powerful orgasms simultaneously. The kiss between her main heads broke as she screamed in pleasure, completely wetting the sheets and spreading her twelve arms to hold on to the bed.

Her two tails retreated from between her legs, moving up to her other two heads to look into her own eyes twice. She couldn't help but laugh at the sight of her two tails covered in fluids and she couldn't stop herself from doing something about it either. She moved them closer to her breasts to use all six of her tongues to clean them as best she could.

Hours passed while Antonella continued to have waves and waves of orgasms, almost without resting. For a moment she was more relaxed on the bed with her notebook and her phone, watching different erotic scenes and videos on both and taking full advantage of her four heads to stimulate her body while doing so.

Suddenly she received a message from Sophie and Lucy on her phone, dedicating one of her heads and two of her arms to it without stopping stimulating herself with the rest of her limbs and heads.

<Hours have passed and we don't see you online! Are you enjoying your mutagen? Hehe> said the message.

<Eh, no... I had fallen asleep. I'll try it later... by the way, are there any consequences if I use both doses at once?> Antonella replied as another double orgasm hit her.

<Not really. It's just that the effect lasts longer... and usually causes more extreme mutations>

<WHAT?! Longer? How much longer?> Antonella replied without thinking twice.

<Haha! Have you used both doses already? It usually lasts two to three days... Thank goodness the weekend is coming> the sisters replied.

<I... I might have used them. Oh well... that doesn't sound bad, I can last a couple of days like this>

<Why don't you send us a picture of what you describe as 'like this'?> the girls replied.

< I don't think I'm in conditions to show myself... you know?> Antonella said.

< Let us guess, is it because you're covered in fluids? What's wrong with it? We reminded you that we fused with you before and we've masturbated and everything hehe>

<Yeah... yeah I know, I remember it well. But I'll only show you under one condition>
Antonella replied, preparing to take a picture of her current body.

<Save messages and tell us the condition>

<First, get more doses and second, I want you two to use them too> Antonella said.

<Those are two conditions, but okay... deal!"> they responded. Antonella immediately sent a picture with a winky face emoticon.

<WOW... yeah, okay... we'll bring them to you tomorrow>

<Wait, tomorrow I'll still be under the effects of this and I have no clothes to wear>

<Better yet... see you tomorrow 😊 😊 > the girls replied.
