GUIDELINES AND LIMITATIONS

For Addons, Page Numbers and Other Work Details.

PIN UP IMAGES

Limit of 9 Addon characters. Limit of 6 Alts per character. Addon Characters are sized equal to or smaller than the base character. Alts include expansion, outfits & other minor changes.

ANIMATION SPOILERS!

I am trying to find a way to make comics & animations cheaper to produce to offset costs & time by improving my workflow, using better typography & animation programs, or simplifying my art style. Motion comics would be like making a comic but animating it using a visual novel-styled puppet animation with SOME frame by frame & audio stuff. As such, I'd like their base price to be 200 compared to comics 100.

HOWEVER, all comic prices may have to change. It's far more intensive & time-consuming than doing paintings, let alone Scripts, Music/Ambient Audio, Sound effects, Typography, or other project needs.

Most likely, the price change would be for Addons, NOT the base price.

Regardless, I'm working on a FULL COMIC PAGE ANIMATION FIRST so I can properly gauge how long it takes to produce one. It would be structured like a Comic Page, 5 Shots (Panels) with Text Dialogue, Audio & SFX.

So look forward to seeing it once commissions are officially Announced!

BASE HEAD HEIGHTS

At their original scale a HU is equal to 25cm (About 9.84IN)
Character Heights are limited between 5 to 8 Head Units.

Any smaller or larger tends to get problematic.
6.5 HU is the Average Head Height.

HEAD HEIGHT AND SIZES OF FEATURES

All sizes are based on the character's Head Height.

Size features will be scaled up or down to match their base height. This maintains contrast between sizes, such as breast size to height.

HEIGHT SIZES

Short Stack Heights

Hyper Shortstack = 5.00HU

Ultra Shortstack = 5.25HU

Super Shortstack = 5.50HU

ShortStack = 5.75HU

Average Heights

Shorter = 6.00HU

Short = 6.25HU

Average = 6.50HU

Tall = 6.75HU

Taller = 7.00HU

Tall Stacks Heights

Tallstack = 7.25HU

Super Tallstack = 7.50HU

Ultra TallStack = 7.75HU

Hyper Tallstack = 8.00HU

EXCEPTIONS TO SIZE RULES

Lips do NOT scale to HU as head size doesn't change with their height.

Top to Bottom Lip Ratio is 1:1.5.
Max total lip size is 1/10th of Total Breast/Booty Implant size.

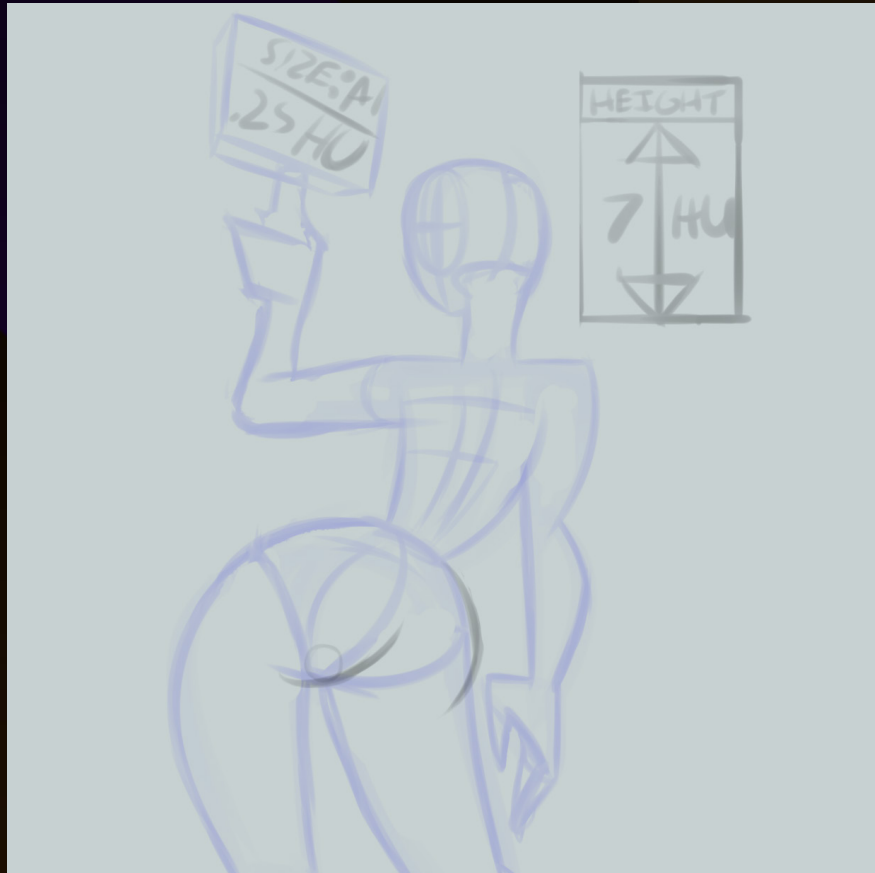

Because the belly is one unit it is scaled to equal the TOTAL HU of Breast & Booty Implants.

Cock to Ball Size Ratio is 1:0.40.
The Cock is a single unit so it is scaled like the belly is.

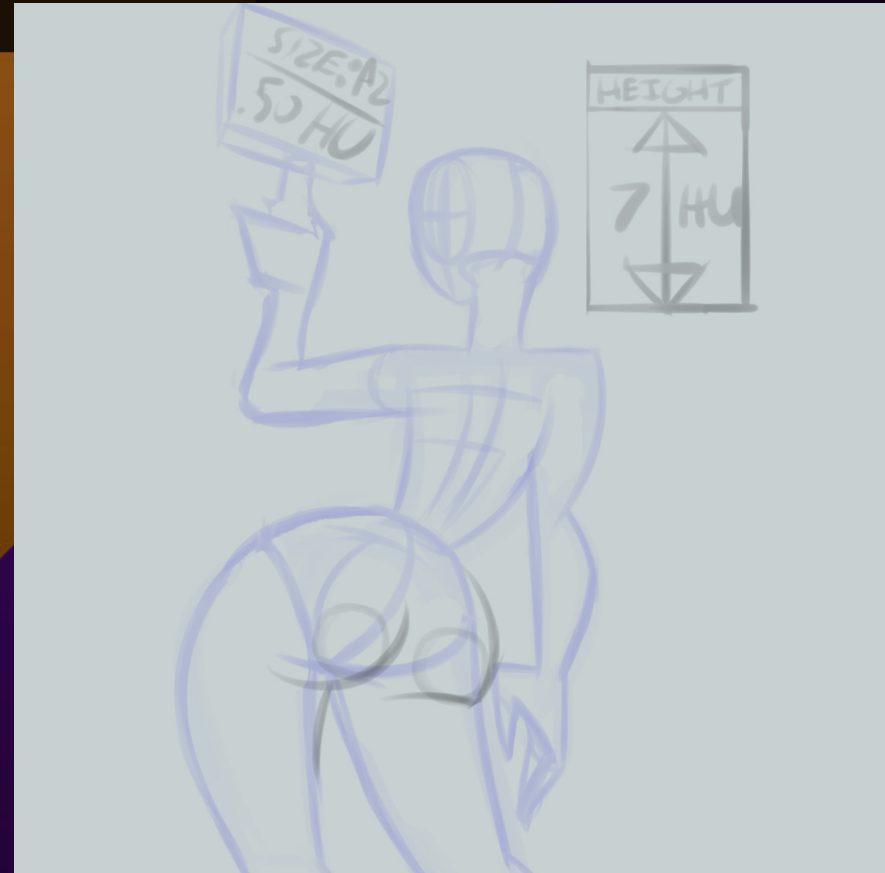

While I aim for a specific size, this is just a guideline. I'll resize things to make the composition work.
