Hi! Welcome to a 2D Tutorial that allows you to re-build layer by layer!

Each build has a material list with custom icons that represent each individual block. Note: some blocks can have different states and requier more than one icon to show the block position correctly. Please carefully look at the Instruction page on how to read 2D tutorial. If you have any questions please let me know on my Patreon page! I also included pictures of the complete build at the end of this PDF. Use them to reference particularly hard parts.

Enjoy <3

How to read the 2D guide - Instructions

This block represents a stair! (half bright, half dark)

The "lower" text means it's a lower slab, like shown here!

When you see a handle it means it's a standing trapdoor!

The arrows mean it's upside down!

The "upper" text means it's an upper slab, like shown here!

When you see a door knob it means it's a door!
Careful to not mix it with trapdoors!

This represents an outside corner block.
It can also show up with the upside down symbol!

Trapdoors can also have the "lower" text, so be careful to not mix them up with slabs since they might look similar!

C = Ceiling

This represents an inside corner block.
It can also show up with the upside down symbol!

The "upper" text means it's an upper slab, like shown here!

		101x Spruce sign			11x Tripwire hook			1x Birch button			21x Calcite
