+1 RING

Originally created as a novelty item by merchants, it was almost immediately co-opted by shadier merchants and spies for more nefarious purposes. While merchants use this ring to innocuously craft a wealthier appearance, spies use it to create royal signets that can pass them behind fortified lines.

When you wear this ring, an illusory ring appears on another finger of your choice on the same hand, which lasts until you remove the *+1 ring*. You choose the appearance of this illusory ring each time you wear the ring.
