

SWIMMABLE WORLDS – WILLOW CREEK

(SAGE ESTATES AND PENDULA VIEW)

BY NERDYDOLL

The ZIP file contains 2 folders:

- Backup – use only when you want to uninstall the mod
- World Files

Step 1: Open the World Files folder from the ZIP file

Open the World Files folder and copy the worlds you want to be swimmable. You can copy both at the same time as they are in the same game folder.

GD_GardenCommunity_01_LL.world - Pendula View

GD_GardenEstate_02.world - Sage Estates

 GD_GardenEstate_02.world	10/28/2025 1:10 PM	WORLD File	3,043 KB
 GD_GardenCommunity_01_LL.world	10/28/2025 11:58 AM	WORLD File	2,180 KB

Step 2: Copy the Files into the Data Areas Folder

Look up the specified file path for your game as listed below. *The correct folder has only .world files and no package files!*

Note: This is **not the same** folder as your Mods folder!

Windows Computers:

EA App: C:\Program Files\EA Games\The Sims 4\Data\Shared\Worlds\Areas

Steam: C:\Program Files (x86)\Steam\steamapps\common\The Sims 4\Data\Shared\Worlds\Areas

Origin: (if you installed before the EA App, now you would be using EA App to launch)
C:\Program Files (x86)\Origin_Games\The Sims 4\Data\Shared\Worlds\Areas

Mac Computers:

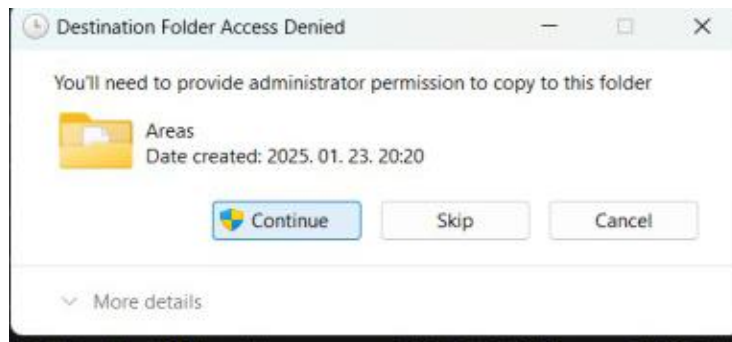

Alternative 1: MacintoshHD\Users\YOUR_NAME\Applications\The Sims 4 > Right-click on The Sims 4.app and choose Show Package Contents\Contents\Data\Shared\Worlds\Areas

Alternative 2: MacintoshHD\Applications\ > Right-click on The Sims 4.app and choose Show Package Contents\Contents\Data\Shared\Worlds\Areas (If you have chosen a custom installation path, you will have to navigate to that)

Note: If you have custom installation, you must navigate to the desired place!

Replace the .world files. You must click on the *“Replace the files in the destination”* prompt.

It might happen that you receive the prompt: *“Destination Folder Access Denied”*. In such case, you must click on the *“Continue”* button to be able to paste the new files into the folder.

After Installation
