

SWIMMABLE WORLDS – GRANITE FALLS (NATIONAL FOREST)

BY NERDYDOLL

The ZIP file contains 2 folders:

- Backup – use only when you want to uninstall the mod
- World Files

Step 1: Open the World Files folder from the ZIP file

Open the World Files folder and copy the world you want to be swimmable.

GP01_Forest_01.world - National Forest

 GP01_Forest_01.world	11/1/2025 1:25 PM	WORLD File	4,659 KB
--	-------------------	------------	----------

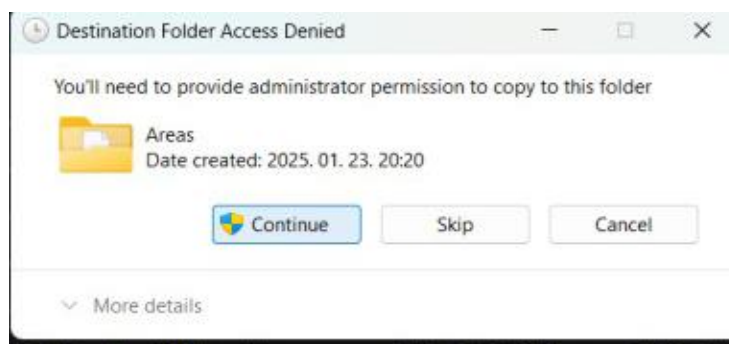

Step 2: Copy the Files into the GP01 Delta Areas Folder

Look up the specified file path for your game as listed below. The correct folder has only .world files and no package files! After locating the Delta folders, navigate to Delta>GP01>Worlds>Areas.

Replace the .world files. You must click on the “*Replace the files in the destination*” prompt.

It might happen that you receive the prompt: “*Destination Folder Access Denied*”. In such case, you must click on the “Continue” button to be able to paste the new files into the folder.

Note: This is **not the same** folder as your Mods folder!
