

曉

Mr. Xu,

First, I'd like to thank you again for the weekend outing. My wife and I had a fantastic time accompanying you to the opera.

Attached is the file on Dr. Mason from the University of Chicago. He recently published a paper on hormone therapy tailor-made to a patient's genetic makeup. The preliminary results are remarkable. Transgender participants in his study saw results twice as fast, and the hormone therapy was also far more effective than average.

Dr. Mason may prove an invaluable asset in the new project you're starting with the Platinum Star Club. To test the real efficacy of his treatment (I've known many researchers to lie), I suggest we use the traitor Jason as a test subject. Dr. Mason need not be informed about his unwilling status, at least until we're sure of his moral inclinations.

If you think this is a worthy idea, let me know, and I will initiate contact.

Sincerely,

T. Davis
