Important Note:

At this point in the game, you'll need to make an important choice that divides it into two parts: the Agency section and the School section. Both sections have multiple endings and different stories with unique characters. However, please note that there will be no scenes in the Agency section until version 0.9. Therefore, if you are playing versions before version 0.9, please choose the School path.

-Go professional (Agency path)

-Stay in school (School path)

Note:

At this point in the game, you'll have the freedom to explore and interact with the characters as you please. Please note that missing scenes will be added in future updates. For version 0.8, Brenna and Whitney, as well as a few scenes with Ayse, are available, along with some school events. You are free to spend time with any girl you choose, with

different options available on weekends versus weekdays. After spending time with one girl each day at school, you'll move on to the second menu where different events will occur. Note that in the second menu, you won't be able to choose a specific girl, but there will still be a variety of events to experience.
