

23. Sexual Anatomy

23.7 Male Reproductive System

Hold on. We should at least finish this chapter.

GRAB

Besides,

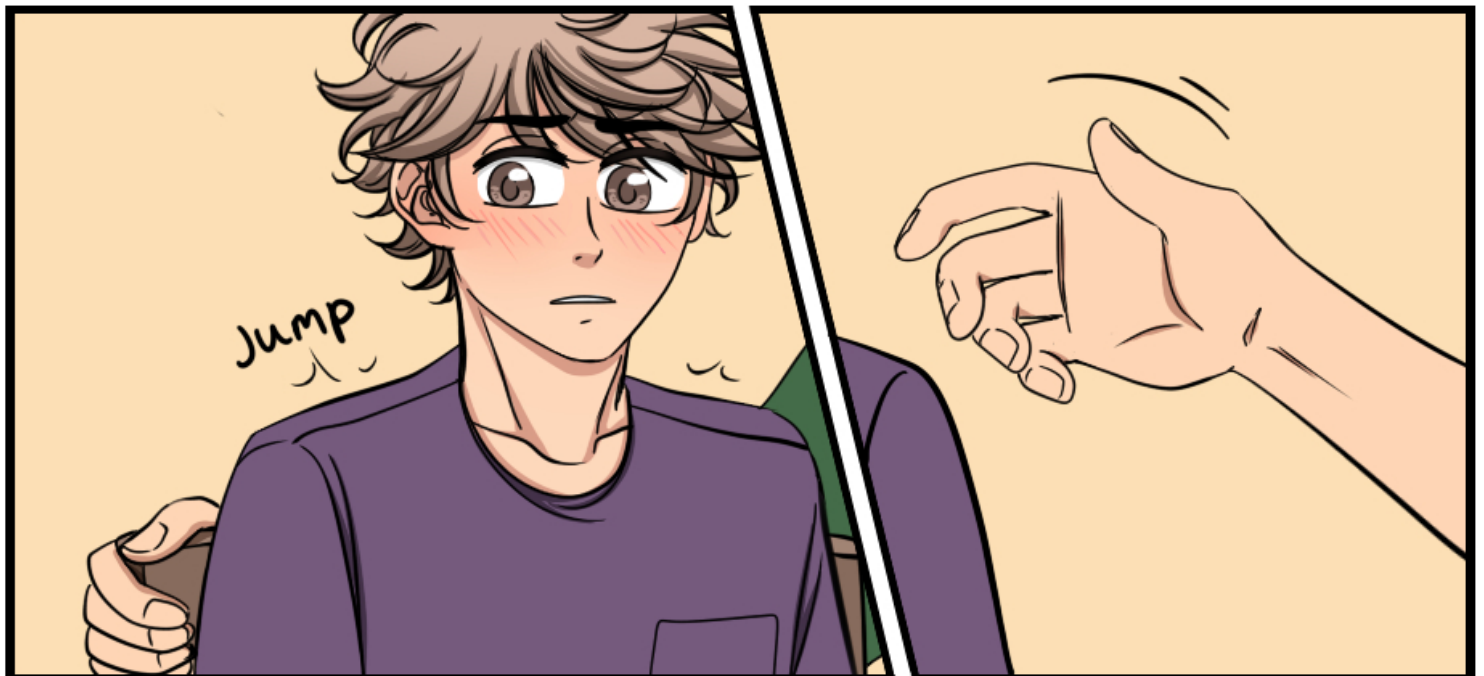

O-okay, uh--

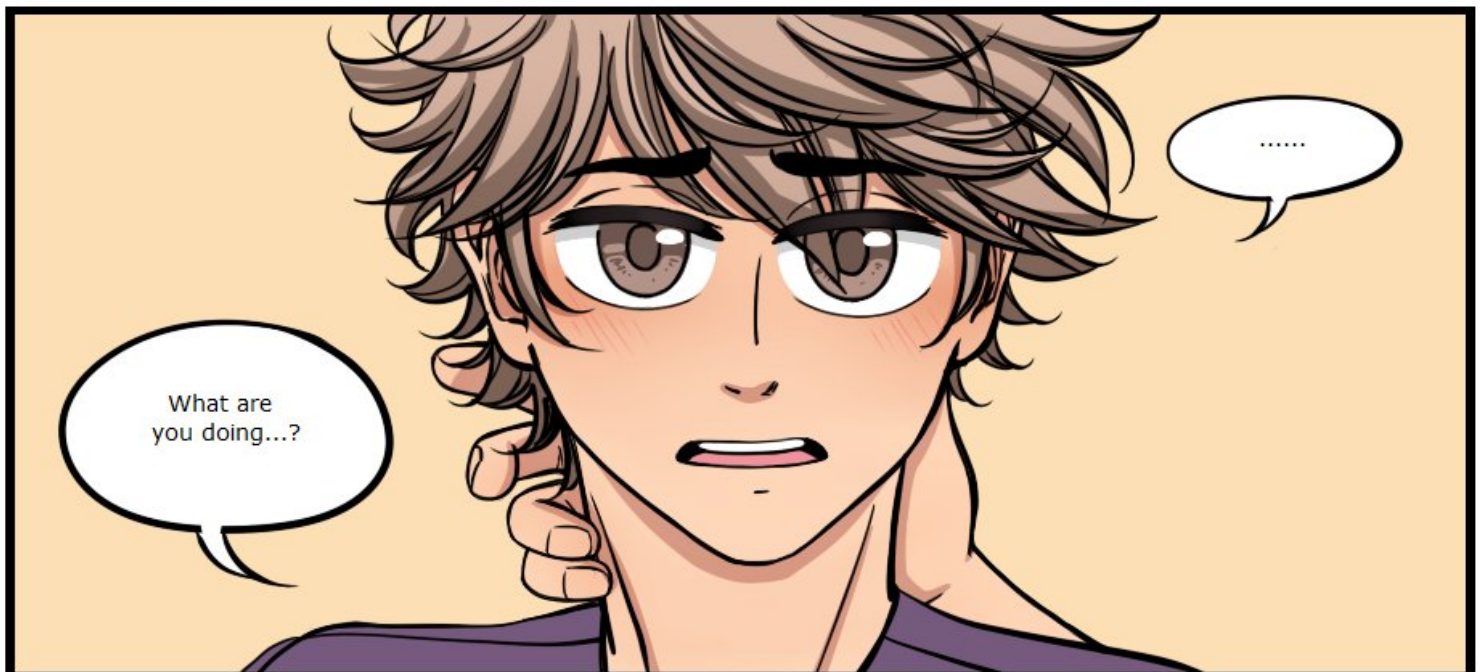

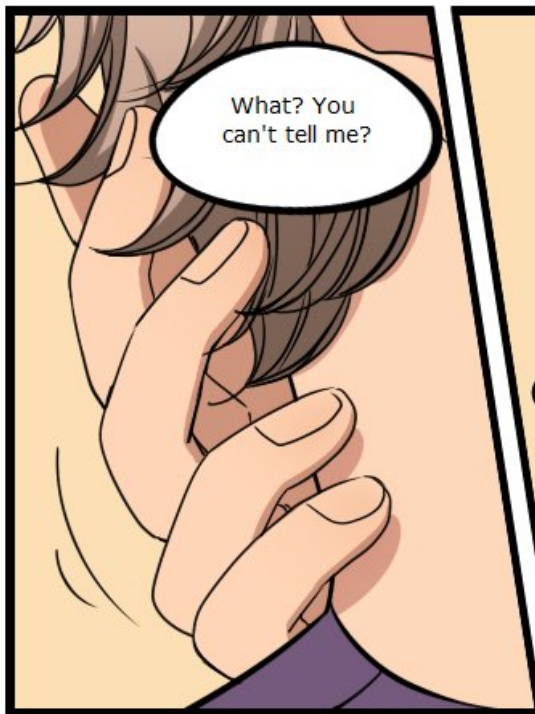

I think that's enough studying for now!

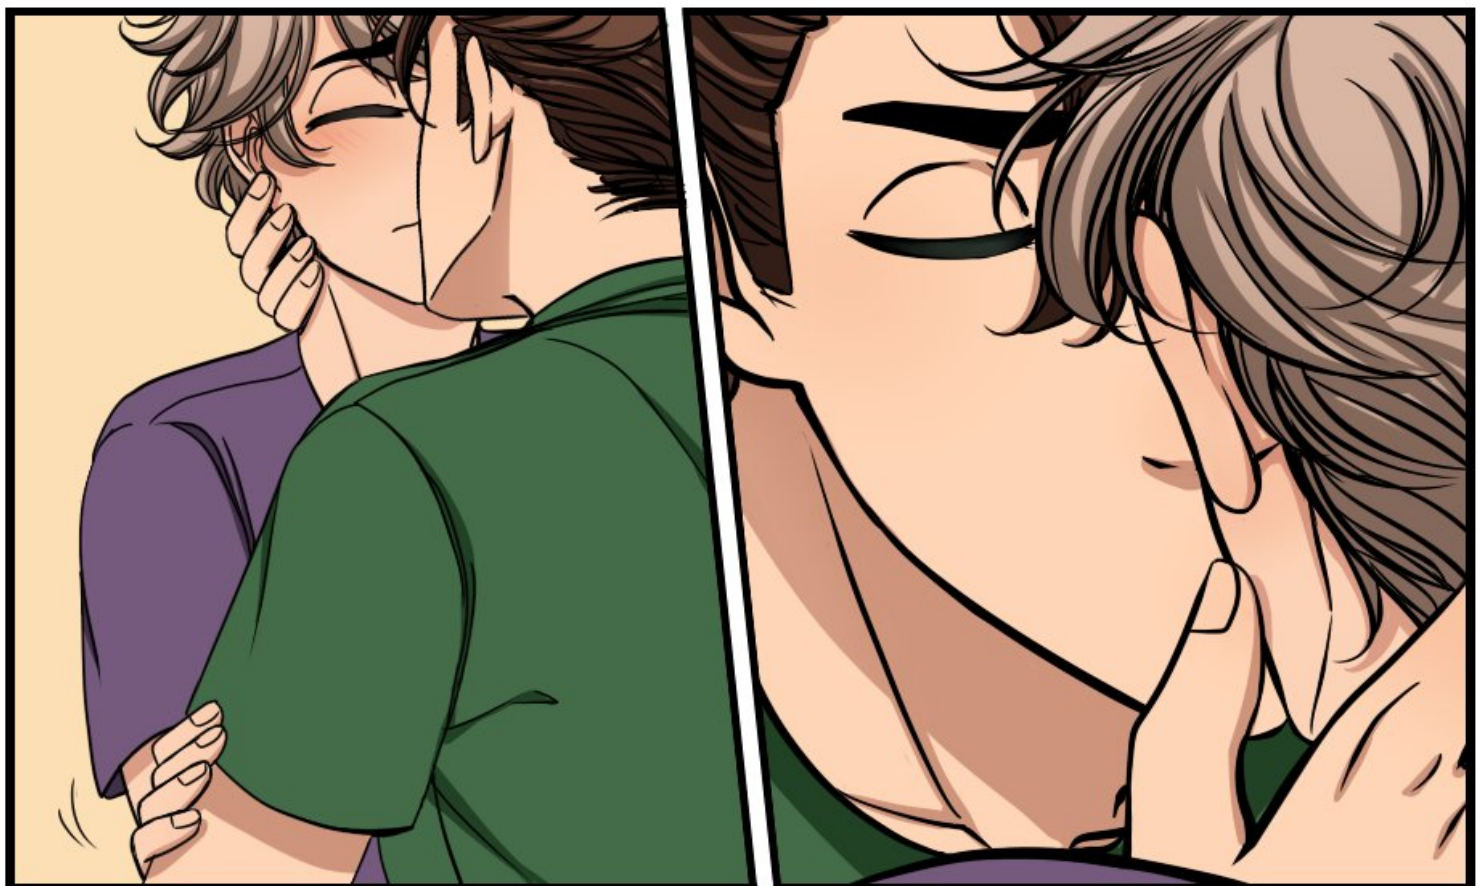

Thanks for helping-

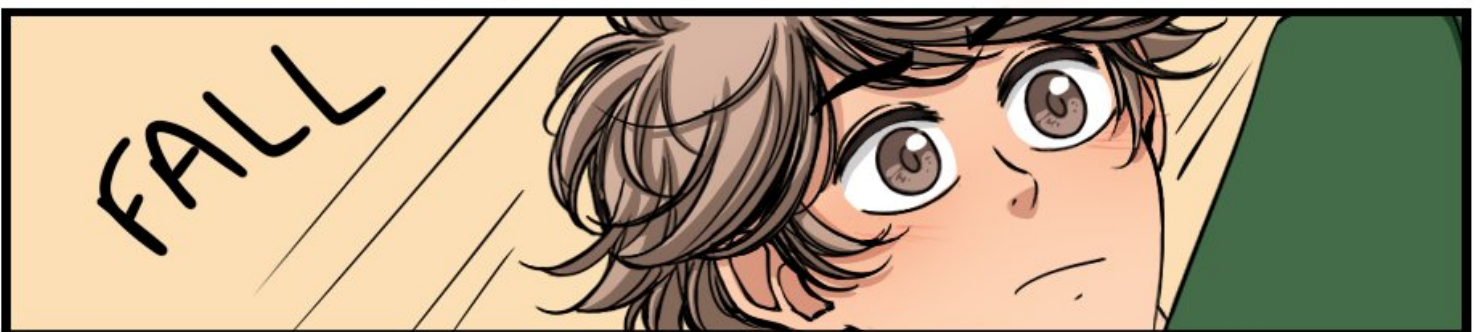

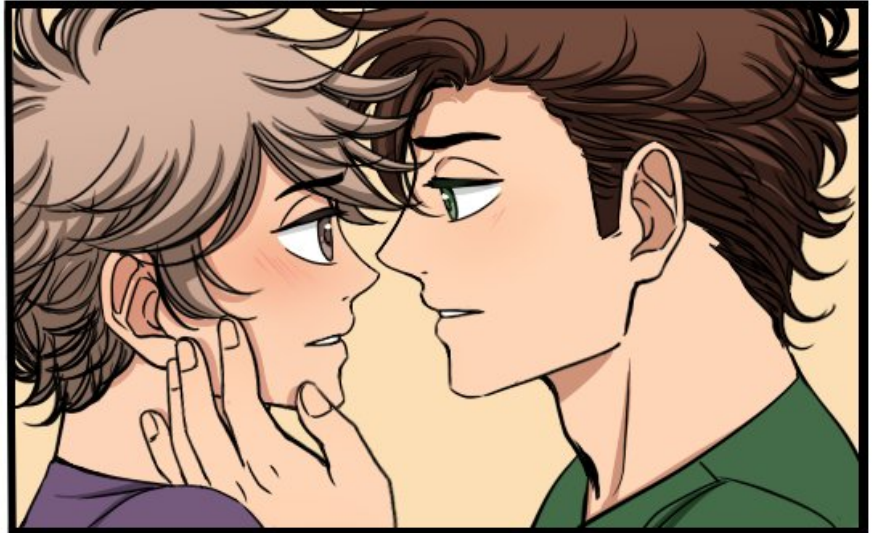

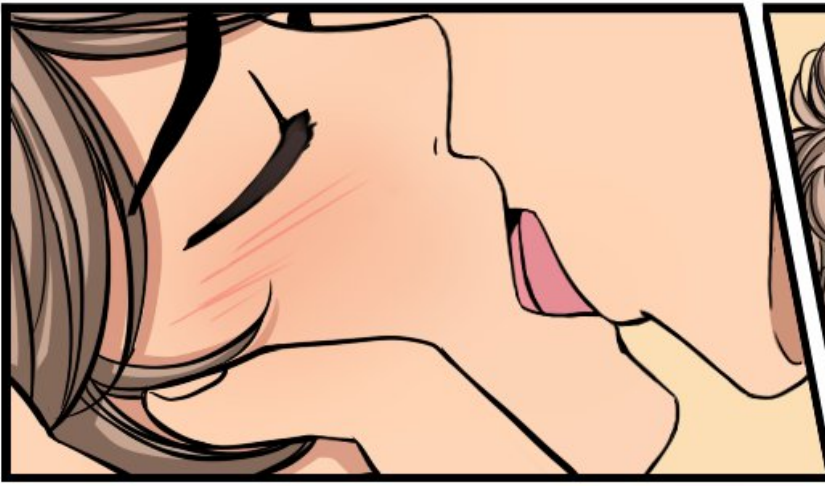

close

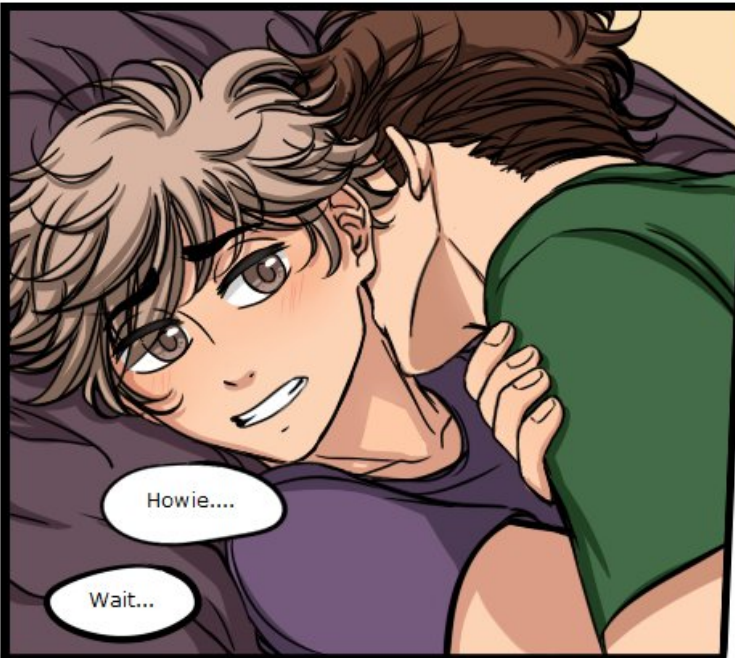

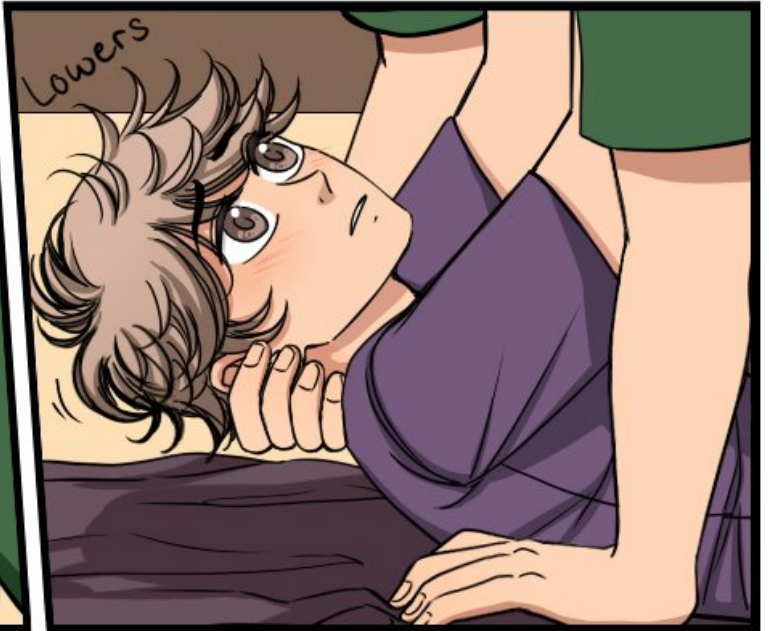

I remember this section really well.

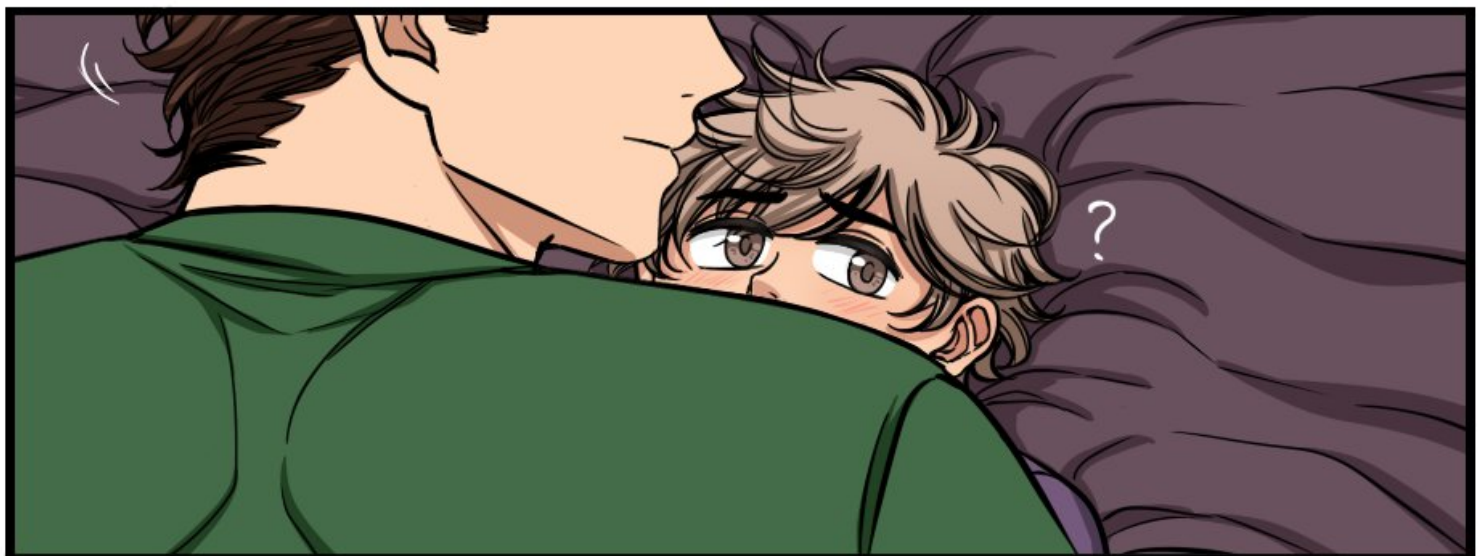

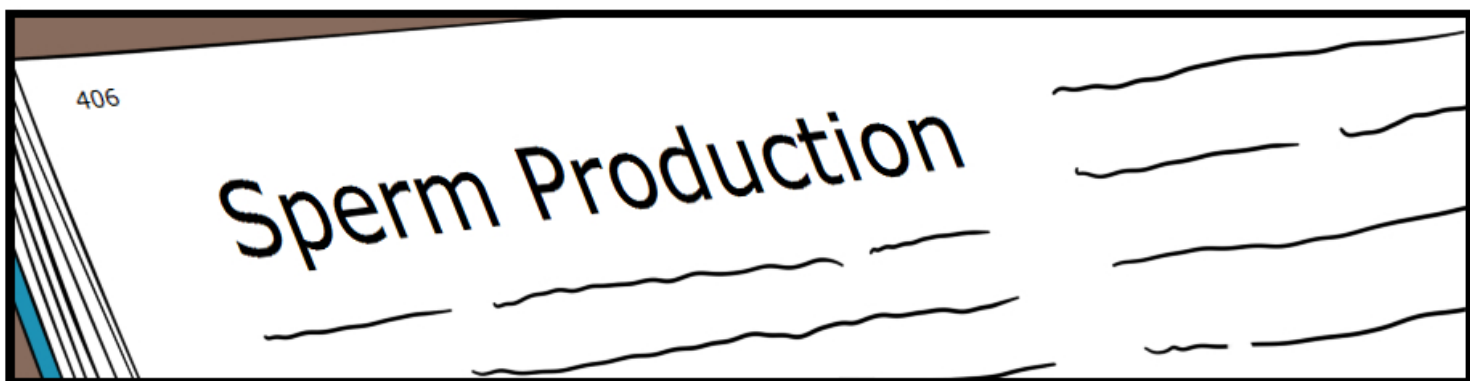

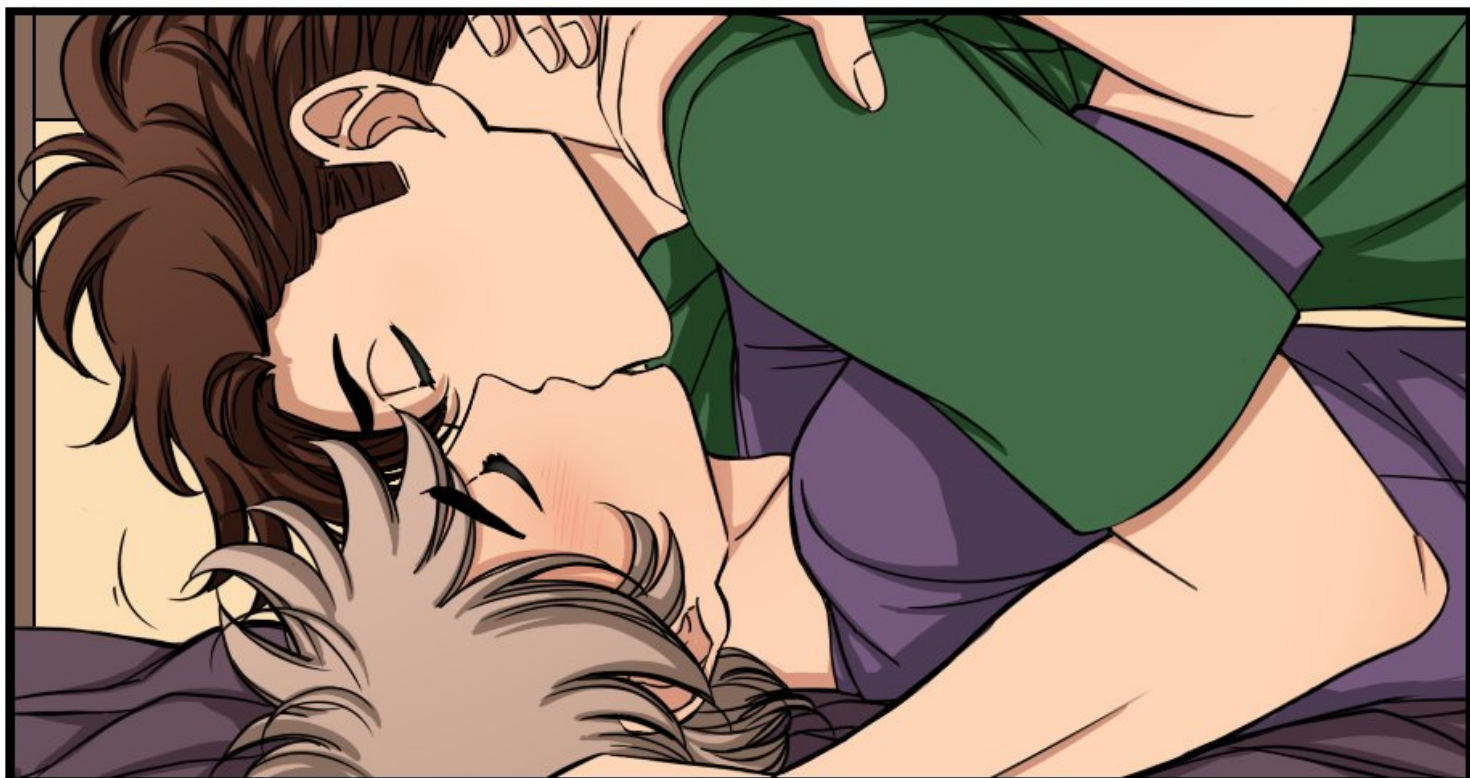

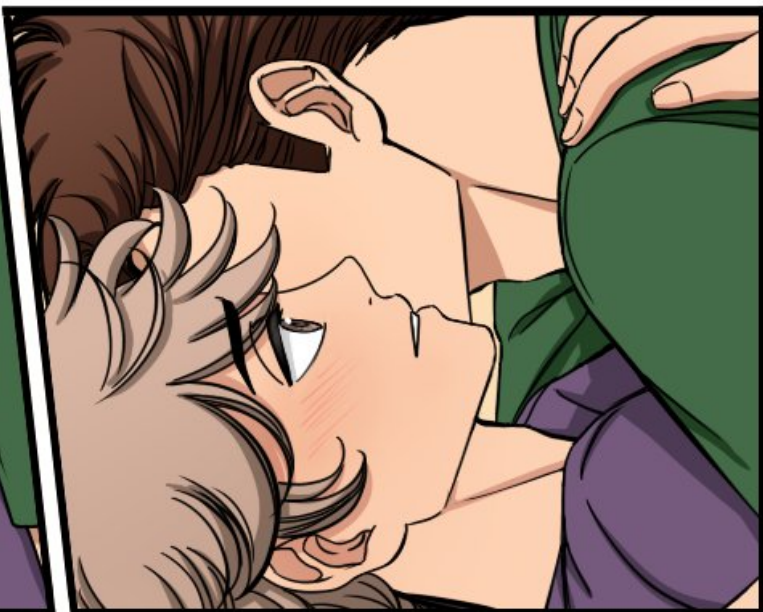

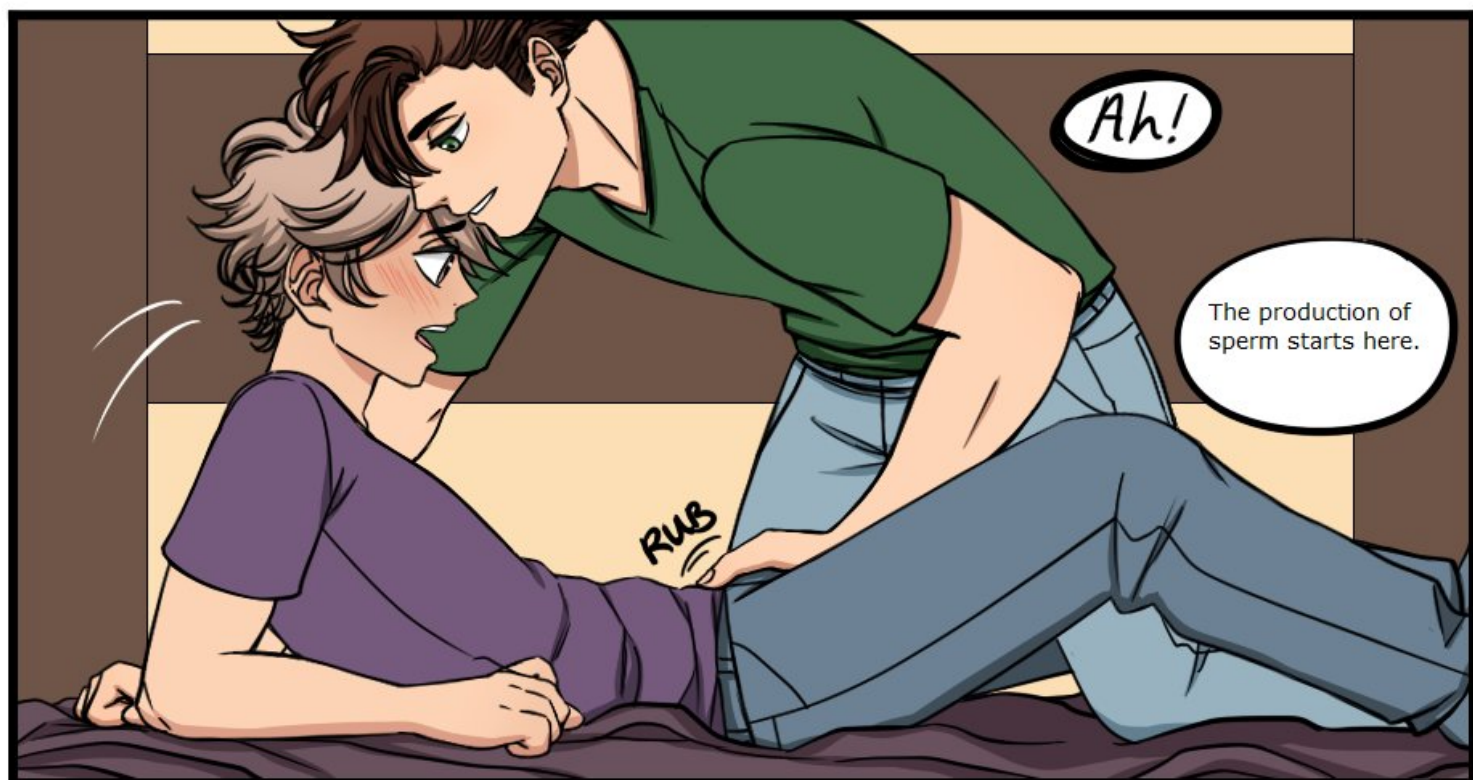

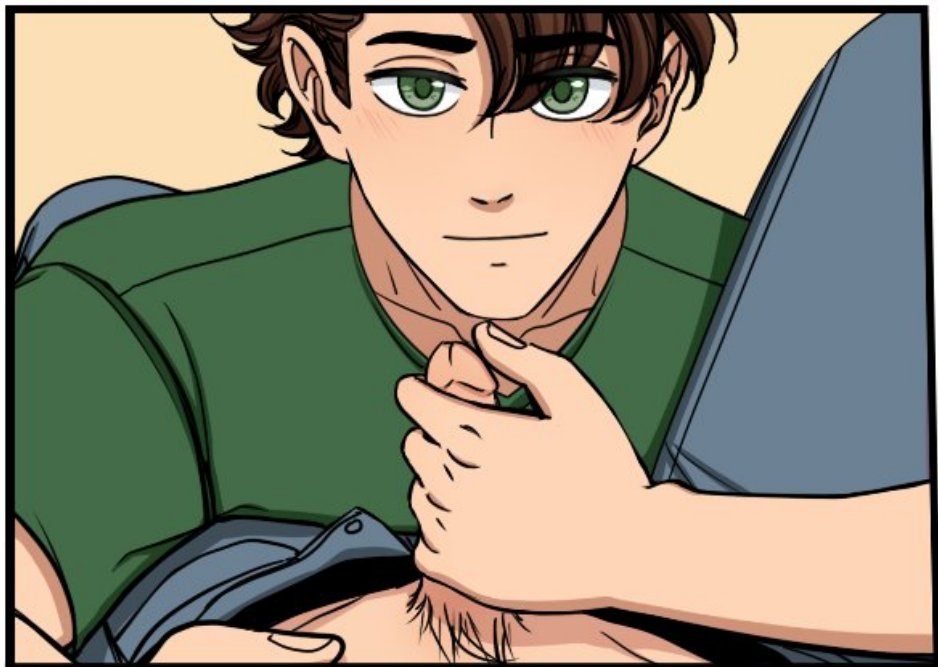

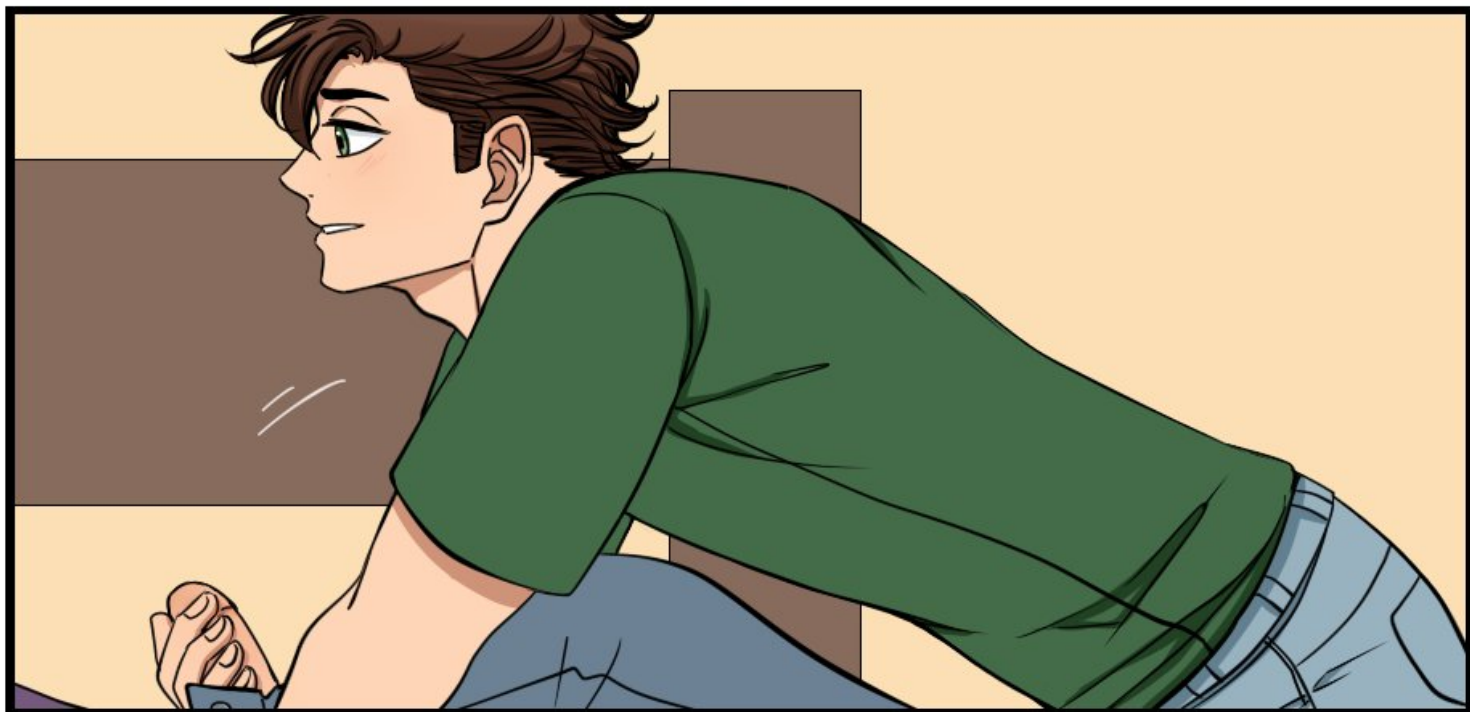

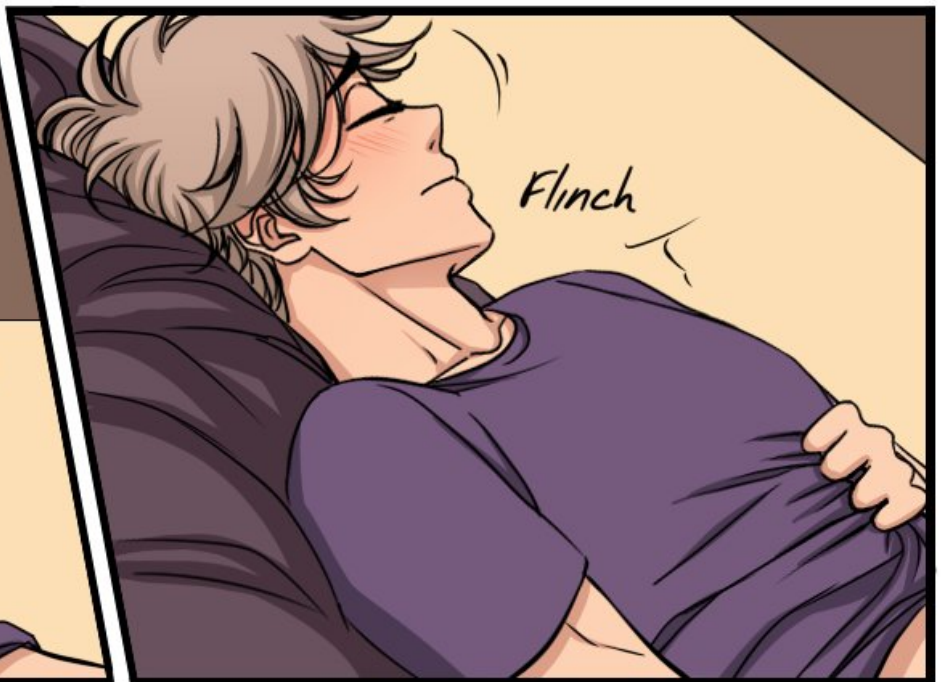

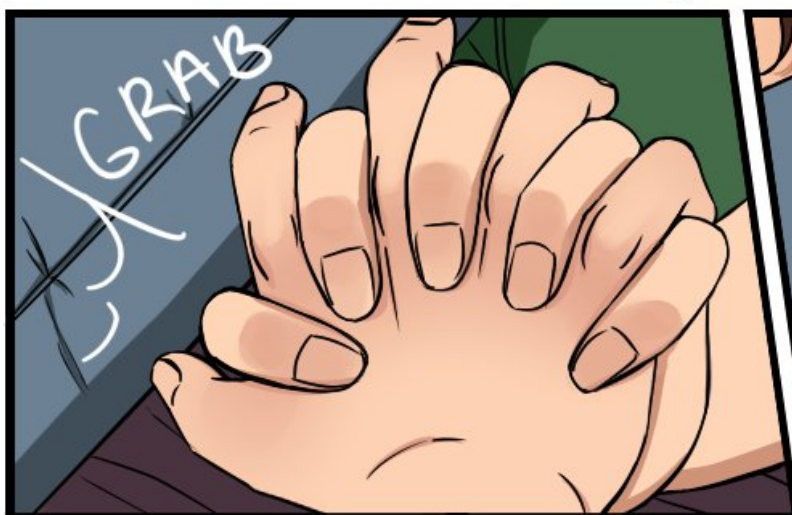

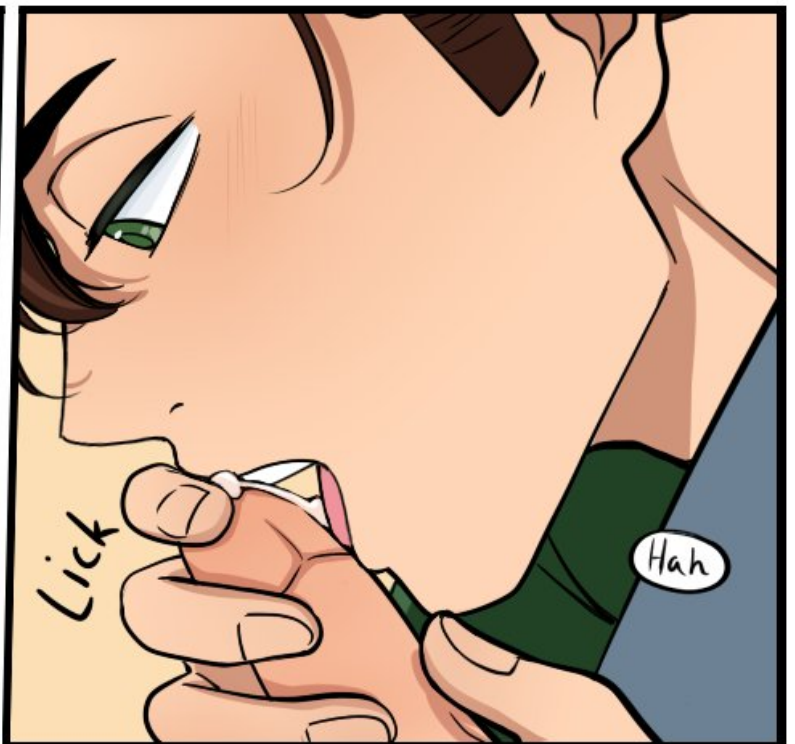

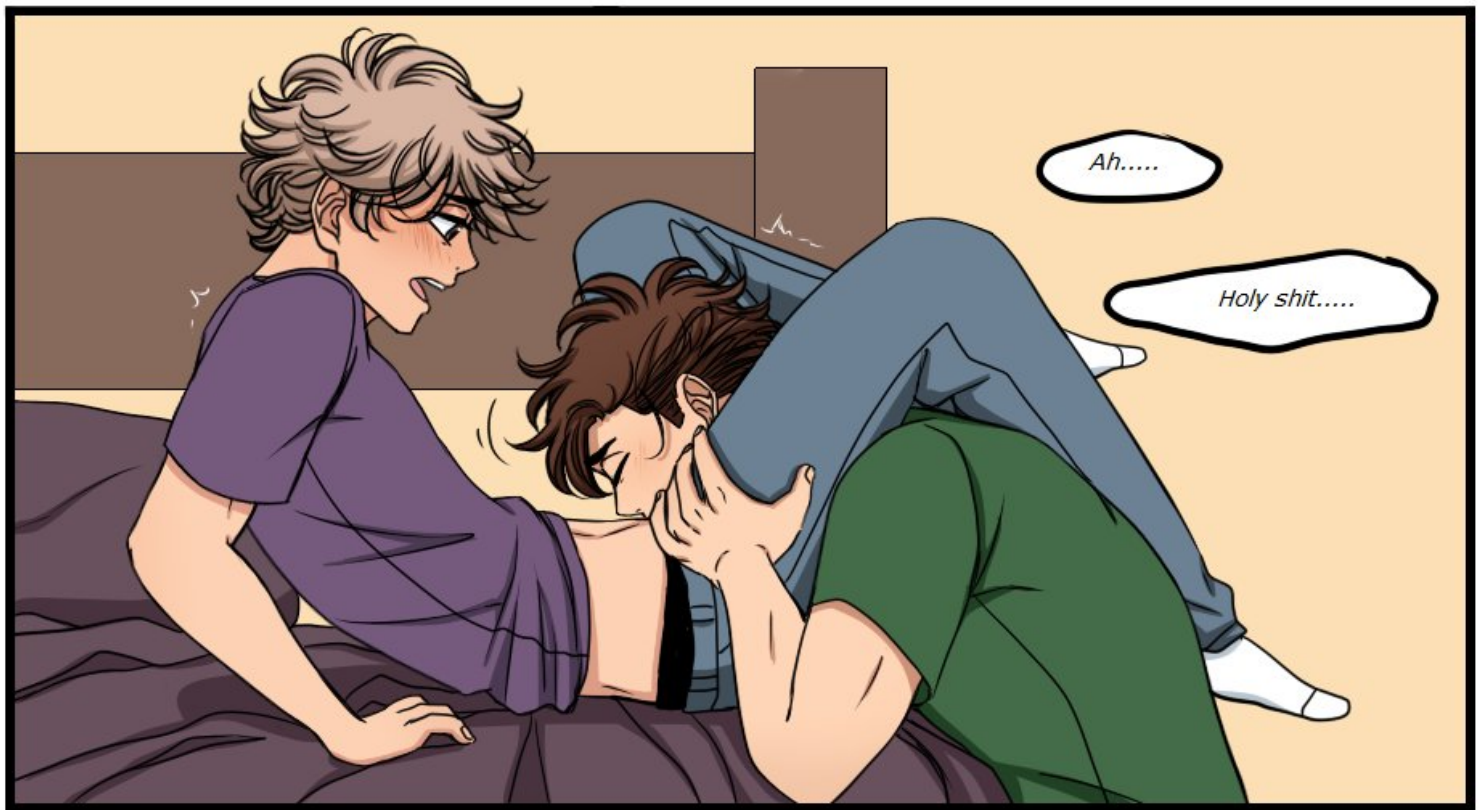

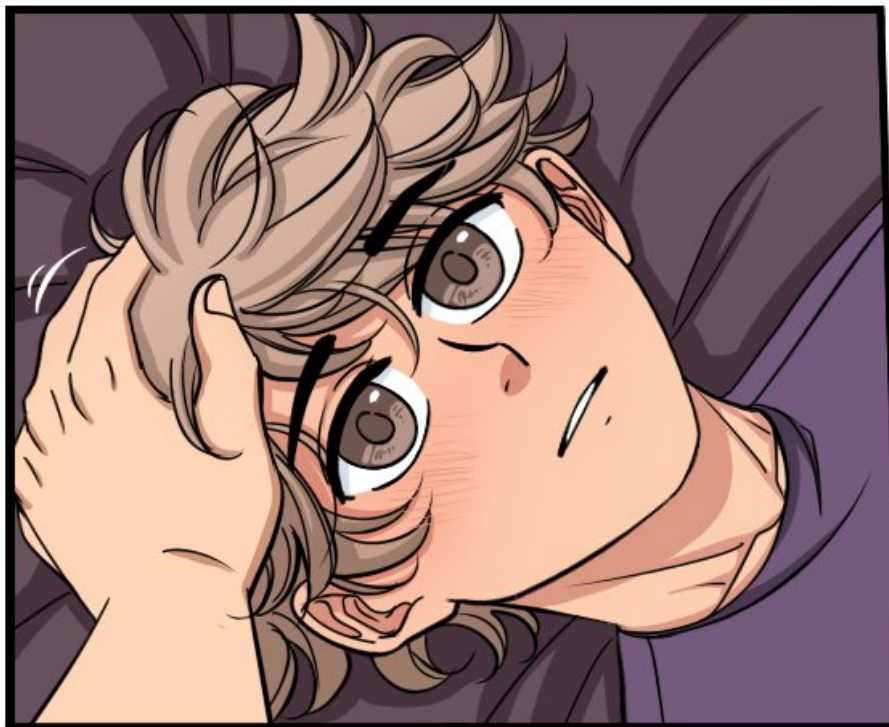

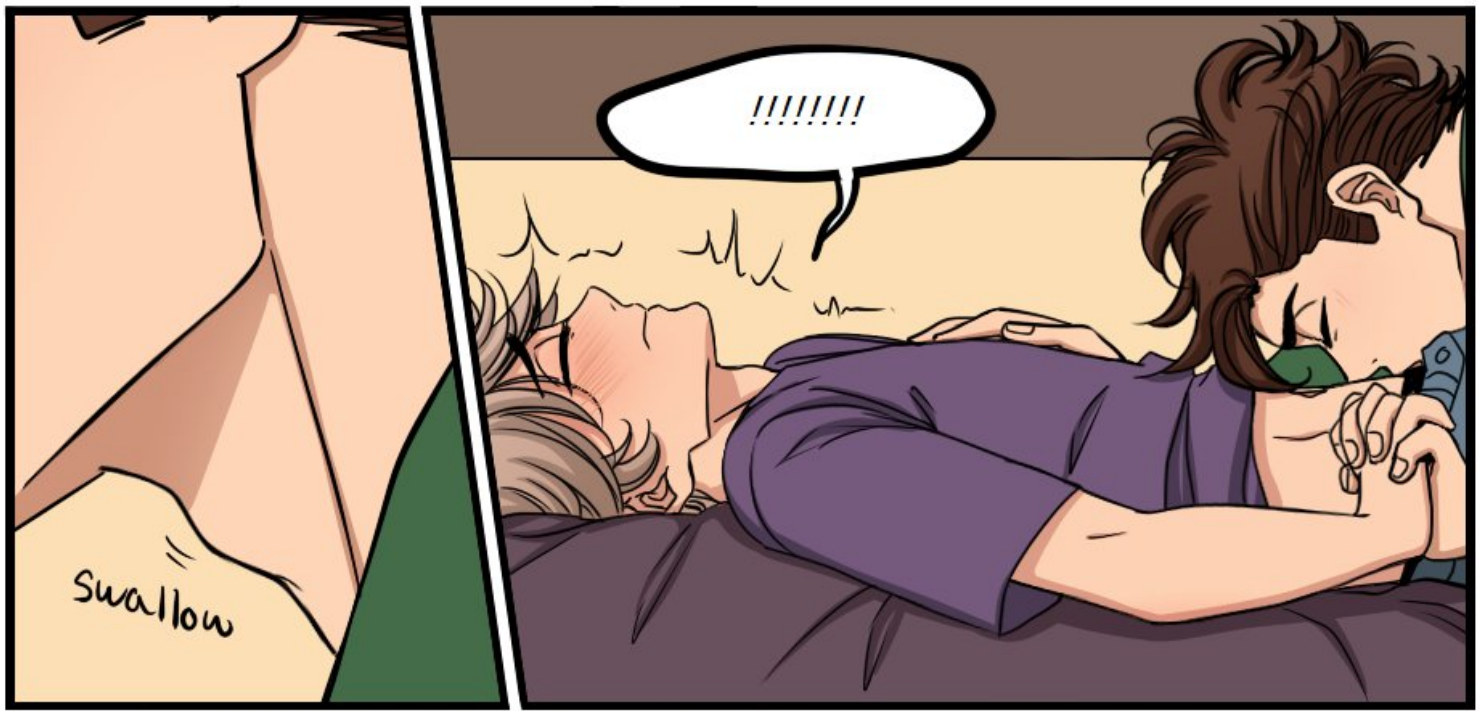

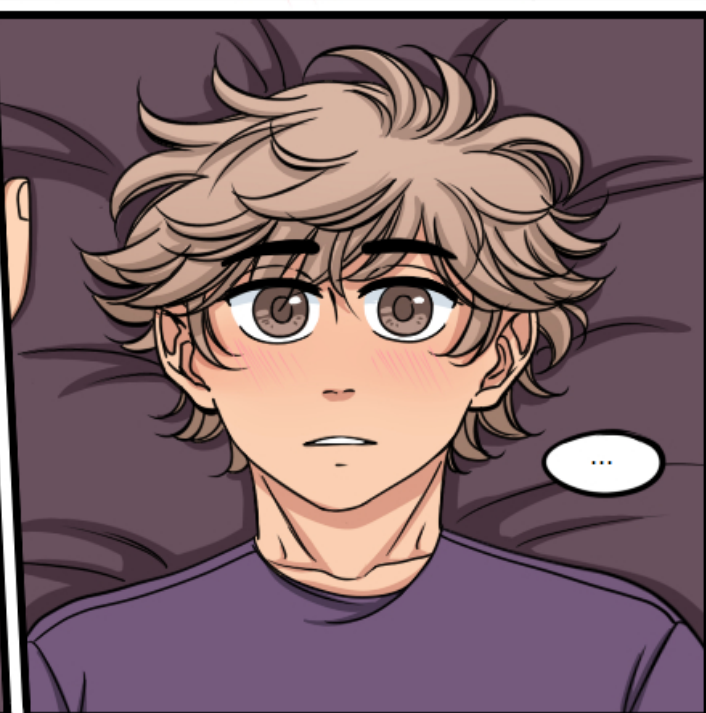

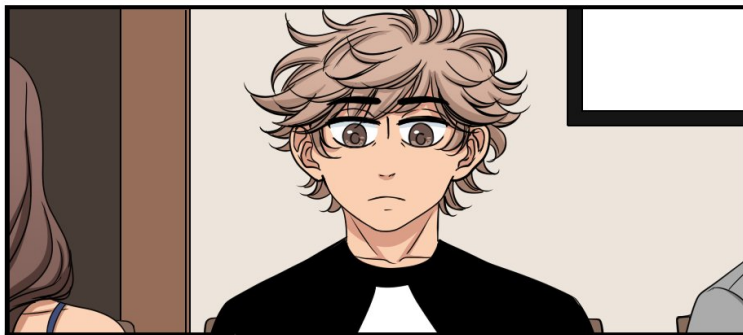

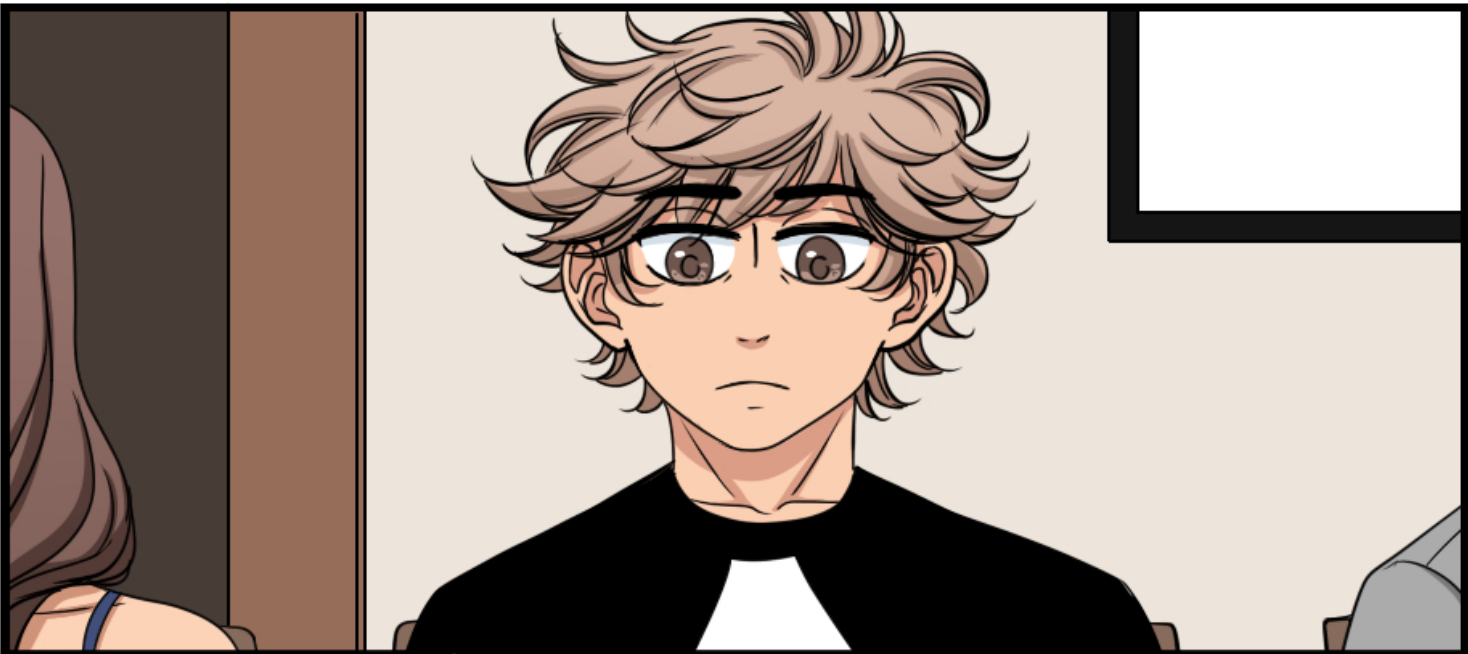

D. All of the above

38. Identify the correct process for the production of sperm.

A. Sperm originates in the vas deferens and is stored there. during intercourse, it is mixed with seminal fluid produced from the testes to form semen.

B. Sperm originates in the testes, travels through the vas deferens,

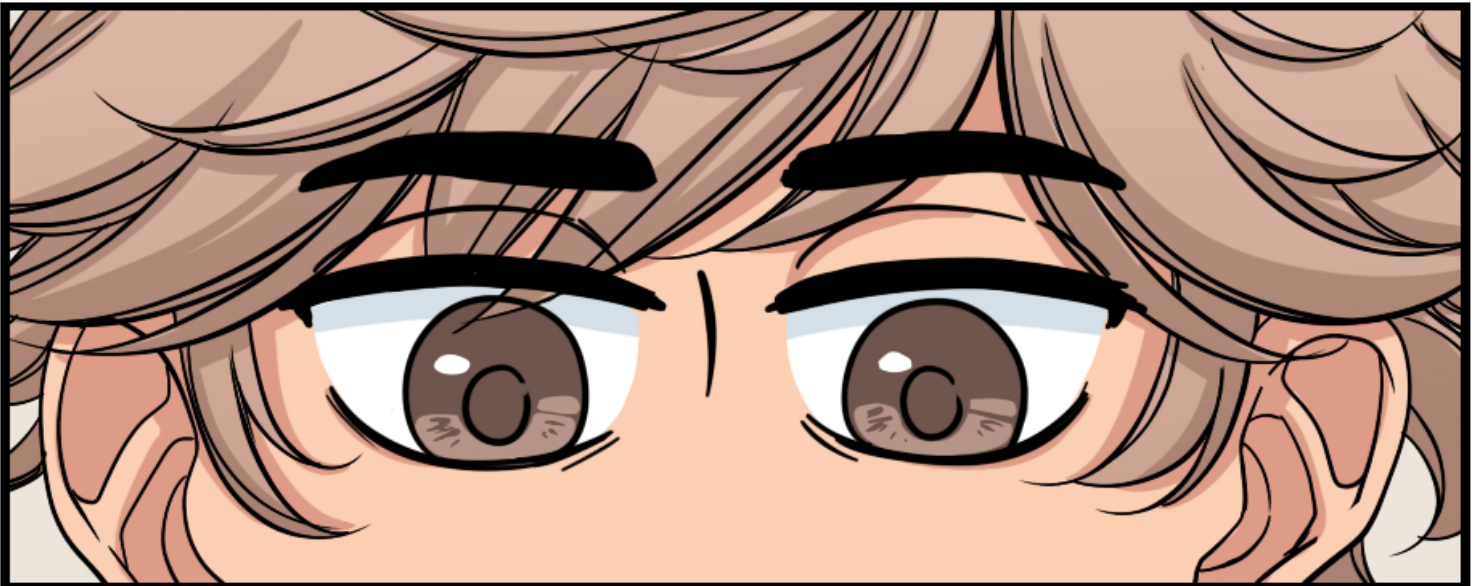

D. All of the above

38. Identify the correct process for the production of sperm.

A. Sperm originates in the vas deferens and is stored there. during intercourse, it is mixed with seminal fluid produced from the testes to form semen.

B. Sperm originates in the testes, travels through the vas deferens,

....The answer is B.
