

The Accident Pt III

Part Two

The following was a commission submitted to me by a Super Fan on Patreon.

The next few days were rather interesting, they both managed not to be consumed by lust again, the lab team turned up and took all the data they could, still nowhere near a cure, they instructed the police to escort Kelly and Wayne to a remote island not too far from shore. It was safer for the citizens of the town and certainly much more freeing for the two lovers.

Arriving on the island, Kelly made quick work of the place to set up some sort of “living quarters” the scientists had got some builders to make a small home for Wayne, that was quite an easy fix but Kelly’s building would probably have taken years to fix.

They had supplies dropped in regularly to make sure they were okay, and the Lab went back to work trying to fix this inhuman change.

With solitude, Kelly started to get those urges again, Wayne too, his balls had grown bigger again, more taut even. She could tell and using her massive hand she picked him up and started to play and tease the hard cock.

“Did this thing ever go down?” She mused, licking the end of it like a lollipop.

Immediately he came, it was like water from a tap, she drunk it hungrily and when the first wave of spurts was over, she removed his dick from her mouth with a satisfied pop.

“We both know that you have a better use than that...”

Kelly plunged Wayne into her desperate sex, noting how he filled her up so much that she could even still hold the shaft that was sticking out and use it to fuck herself without crushing the tiny man.

Wayne was in heaven, the sensations were so immense and huge that he could barely process what was going on, his vision was of his girlfriend’s giant pussy and her massive fist around his dick that was so much bigger than his body he didn’t even know how he was even alive.

The pleasure drove him to cum quickly, his living dildo-esque body was now filling Kelly up with copious amounts of cum, he could see how her womb was expanding thanks to the torrent of his seed.

“Can... She... Even... Get... Bigger...” The question lingered in his brain as another orgasm rocked his miniscule body.

The fucking continued for a few hours, Wayne had no perception of time, of anything other than the immense feeling of orgasm over and over again.

Kelly had to stop because her belly was getting in the way of her arm so she could no longer plunge Wayne's giant cock into her anymore. She knew that Wayne couldn't move either, he was immobile now thanks to his growth, something that she was worried might happen if he kept cumming inside of her.

She draped his cock across her chest and looked down at her tiny boyfriend.

"You... You did good..." She moaned before she drifted off into a slumber.

Wayne looked at Kelly's beautiful face before looking back down at the round cum filled belly.

A sense of worry washed over him.

"How long before she outgrows the island."

Thankfully after he woke up, his body was sustained by the warmth of Kelly's body. He looked down and saw she still had a small bulge; the giantess body he was expecting to have grown even further was actually just the same size.

"I wonder why..."

It was as if her body could no longer metabolise the cum in the same way, like it had reached its limits. Wayne thought for a few more seconds before he realised that he too hadn't shrunk anymore, nor had his cock grown.

When Kelly woke up she was over the moon to have stopped growing.

"It is the reason I didn't play with you sooner... I was worried about getting too big... Maybe I outgrow you, then I'd be alone..." A tear filled her eye.

"It's okay, I'm never going to leave..."

They fucked over and over for weeks, it was nearly the only thing to do on the island, the amount of cum was starting to affect the island, it was a small island with some fauna on it but the amount of cum that Wayne was producing didn't all end up inside of Kelly, it was sometimes soaked into the earth.

The plants surged in growth themselves, vibrant colours never seen by these plants were now being exhibited and some staff members who came to the island were taking notes of the changes, some even noted a different smell, how it was even affecting their libido.

One day Wayne was being inspected by female lab assistant, she was cute and like a pixie, her short bob hair cut was adorable along with how small her features were, she was obviously still so much bigger than Wayne's tiny body but his dick was larger than the woman, measuring at an impressive 10 feet itself, it never became soft, it was like its own living being at this point, no that isn't quite right, it was more like his body was the engine for this giant sex organ.

Call it the pheromones from the plants, the pheromones from Wayne or maybe this pixie girl, Amy, was a freak. She had collected a sample of his potent cum, she held the pot and looked at Wayne and with a smirk she let the intrusive thoughts win.

"What are you!?" Wayne yelled as she scooped up a handful of the cum and licked it clean off her hand.

The sight did arouse Wayne, not a lot didn't nowadays, but he was worried for what that could do to the small girl.

The effect was almost instantaneous. She jumped onto his dick and started grinding her body against the gigantic prick that was almost double her in length and thicker than her body. Wayne thought she orgasmed rather quickly, but from this angle he could only see her ass as she rode him, she was licking and kissing his bulbous cock head, and it was inevitable that he would eventually erupt.

Cum fired out of him and Amy leapt off his dick and started to lap up the thick semen off the floor, she even grabbed a fist of it and plunged it deep into herself.

"Am I doing this?" The moral quandary didn't linger for what happened next stunned him.

The girl started to grow, it was easy to see, she was already so short and small that any growth was very noticeable especially to someone already so small.

Amy straddled his dick once more and started to grind herself on it more, moaning loudly as she came again, all the while still growing.

There was a giant crash and the roof of the makeshift lab they made was being opened like a tin of beans. Through the ceiling Kelly looked down at the tiny girl essentially fucking her man.

Where Wayne might've expected rage, she instead gave a look that was the norm now.

She was horny.

With her massive hands she grabbed the girl and Wayne, like a child playing with a doll she tried to ram the gargantuan cock into the steadily growing girl, the sensation was more than enough to make him cum again and much to Kelly's delight, she got it into the tiny girl's pussy.

"You want to grow? You want to join in the fun?" She rubbed the girl lovingly with her hand. "The more the merrier..."

Amy grew and grew until she finally stopped, despite taking more cum, a solid 30 feet, she was still rather small compared to Kelly, but that didn't stop her having fun with her.

The rest of the week was taken up by the three of them fucking one another.

The lab was astounded by the changes, her blood was taken when things started to calm down and there were extensive tests completed to understand everything. The island was deemed as a hazardous zone and hazmat suits were required as to not let another situation like Amy's occur.

However, Amy was far from the last one to grow on that island.

More women joined the island lab research along with males as it was feared that it was getting out of hand. The former of the scientists were mostly okay except for a few.

Jude, a busty older woman caved and took her helmet off to get a sense of the smell of the island. She wanted to document everything, it would be her undoing as she grew to a solid 40 feet in height, her tits bigger than cars at that scale. Kelly certainly enjoyed playing with those, as did Wayne's cock, buried deep between them.

Laura, a fat girl who wanted a change in her life, a loner and loser. She was a single virgin and being fat and in her mind undesirable, she wanted nothing more than to make a change. She theorised that the cum would make her look like the others, tall, slender for the most part. She was wrong. Laura grew bigger, fatter and all round massive. Her tits were huge, and her belly stole the show. A gargantuan gut that made Jude's breasts seem small. Wayne getting his dick rubbed against the fat woman's belly, it gave Laura a sense of desire as she could tell how much Wayne enjoyed it. Laura ended at around 35 feet tall.

Lastly there was Emma, she was a bottom heavy woman, a size queen, someone who just happened to be smart, she kept her deep desires secret but her large collection of dildos were her prized possessions and after a few transfers and some red tape, she managed to get onto the dream job for her. She wasted no time, she got to the island, even in the presence of two men, a new rule required two men to accompany women to the island. She threw herself at Wayne's cock and quickly got her fill of cum. Her growth was rapid like the others, but it was focused on her hips and ass, proportionally it even shifted so that her ass grew much bigger and quicker than the rest of her at first. Her massive cheeks were quickly wrapped around Wayne's dick as she grew to 45 feet tall, the closest rival to Kelly's size.

Emma would be the last new woman allowed on the island. The women took it in turns fucking each other between using Wayne to fill themselves up. The island itself was changing beneath their feet, growing bigger too.

The scientists were running out of ideas, their data collection was complete, they couldn't get any more data, yet they still tried, there were no more changes.

Kelly assumed the role of leader thanks to her size, strength and relation to Wayne. Wayne's cock was used almost 24/7 as the girls took it in turns, their initial growth was significantly faster than Kelly's, which they guessed was because the potency of his seed had increased over the duration of his own growth. Each girl would grow a belly almost as big as Laura's before they had their fill, massively distended looking pregnant even, they would remove Wayne from their stuffed pussies and pass him on like a blunt at a frat party for the next one to use. Laura's belly, her most dominant feature became truly gigantic, it took all the girls to move her massive stomach once she was full, thankfully she rarely needed to move once she was done, she would just collapse on her massive stomach and fall asleep.

Wayne's new life a sex toy was certainly not something he was expecting, it was the farthest thing from reality in his mind a few weeks ago and now he was loving every second of it, it was pure bliss.

Sitting on the beach, staring at the ocean, Wayne looked over the massive women as they played in the water, enjoying how each of their exaggerated features bounced and how they played with each other. He wasn't actually on the sand, he was sitting on Kelly's lap, his cock spanning most of the length of her massive legs.

"I'd say this accident sort of turned out alright in the end."

Wayne looked up at his buff girlfriend.

"Yeah... I'd say more than alright..."
