

CROSSED ARMS INN

BACKGROUND

The Crossed Arms Inn is found deep in the wilderness, several days ride in any direction from the nearest town. However it is always busy, filled with weary travellers crossing the open countryside, and because of this is a great place to gather news and rumours.

The immediate terrain is a series of rock formations interspersed with sparse woodland, meaning it is relatively well hidden but has a panoramic view of the surrounding area. Several gangs of roving bandits have attempted

raids in the past, but the combination of the raised platforms, battle hardened visitors and well trained staff have seen them all off handily.
