

Dear Simmer,

It is a great pleasure to see you here! Katharine, Adam, Heath, and all the Sims who participated in the testing during the creation of this mod would like to welcome you to their beautiful world, Aviodora.

While the mod does not bring back a Sims 3-type open world, it is also unlike the other worlds in The Sims 4. A huge open and playable area awaits each Simmer, containing over 30 active venues and 20 rabbithole venues with no loading screens after the initial load into the world. The world is inspired by real-life destinations such as Amsterdam, Paris, and Santorini.

This documentation will help you:

- **See and Comply with Requirements**
- **Install the Mod**
- **Update the Mod**
- **Add Optional Files**

YouTube

Before installing the mod, I heavily recommend saving your save files (as you should before each game patch or heavy mod updates).

Mod Requirements

A) Packs:

- [Get Together](#)
- [City Living](#)
- [Discover University](#)
- [Seasons](#)

Additionally, it is best to have: [Growing Together](#) (for water playground), [Backyard Stuff Pack](#) (for water playground), [My Wedding Stories](#) (for wedding venue), [Knifty Knitting](#) (for shops), [Toddler Stuff Pack](#) (for playgrounds), [Vampires](#) (for rabbithole woohoo building), [Get Famous](#) (for rabbithole woohoo building), [Outdoor Retreat](#) (for campsite), [For Rent](#) (to be able to break in to houses), [High School Years](#) (for the thrift store), [Cats and Dogs](#) (for lighthouse Woohoo), [Island Living](#) (for waterfall interactions), [Spa Day](#) (for sauna at hotel), [Lovestruck and Cottage Living](#) (for picnic at the park), [Movie Hangout Stuff Pack](#) (for more cinema movies and popcorns)

!! The more packs you have, the better your overall experience will be as you will have more items in shops for example and more interactions. !!

B) Mod Dependency:

- **Lot51's Core Library**

Curseforge Download

Web Download

- Zerbu's The Custom Preferences Mod

Web Download

- Basemental's Universal Venue List **OR** Zerbu's Venue Changes

Web Download

Web Download

!! Please note you cannot have both Basemental's Universal Venue List and Zerbu's Venue Changes, CHOOSE ONLY ONE !!

B) Heavily Recommended Mods:

- Simulation Timeline Unclogger by Turbodriver

Curseforge Download

- FixSocialBunnySimulationLag by Turbodriver

Patreon Download

- Simulation Lag Fix by SrslySims

Curseforge Download

Web Download

D) Computer Specifics

The more powerful computer you have, the smoother the game will run. This is a huge open area; hence the mod will be more likely to lag if you have a weak computer.

To give you a better understanding of the required computer specifications, you can speed through this [YouTube video](#) to see how the game runs on my laptop.

My game settings are on the highest and the game usually runs between 35-160fps, depending on how zoomed out the game is.

My specifics are:

- Processor: 12th Gen Intel(R) Core(TM) i7-12700H
- Memory: 32GB
- Graphics Card: NVIDIA GeForce RTX 3060

Installing the Mod – Step by Step Tutorial

0. Step – ZIP Extraction

After downloading the ZIP File, extract the contents to a desired place. That can be any folder you will find easily.

You should now have the main folder called: Aviodora Early Access with several sub-folders:

- BACK-UP
- MODS
- OPTIONAL FILES
- WORLD FILE

1. Step – Save the BACK-UP FOLDER

The **BACK-UP** folder contains the original SO_DesertPark_01.world file. Save this to a desired place where you can easily access it.

This is necessary as the world file we are going to use during installation has been edited and for a quick uninstalling process, you can just move back the original file from the **BACK-UP** folder. Initially, the game will always repair the original world file during an update or repairing.

2. Step – Pasting the modified SO_DesertPark_01.World into the Areas folder – WINDOWS COMPUTER

Open the **WORLD FILE** folder and copy the SO_DesertPark_01.world file and paste it into Areas folder.

Depending on the App the game is installed through, you must go to:

- **Steam:**
 - C:\Program Files (x86)\Steam\steamapps\common\The Sims 4\Data\Shared\Worlds\Areas
- **EA:**
 - C:\Program Files\EA Games\The Sims 4\ Data\Shared\Worlds\Areas
- **Origin:**
 - C:\Program Files (x86)\Origin Games\The Sims 4\Data\Shared\Worlds\Areas

Or if you have a custom installation, you have to find the folder that contains the game files.

If your PC does not allow it, you can also try to login through your administrator profile and do so that way.

2. Step – Pasting the modified SO_DesertPark_01.World into the Areas folder – MAC OS COMPUTERS

Open the *WORLD FILE* folder and copy the SO_DesertPark_01.world file and paste it into Areas folder.

Depending on the folder the game is installed in, you must go to:

- MacintoshHD/Applications/ Right click on The Sims 4.app and choose: Show Package Contents/Contents/Data/Shared/Worlds/Areas
- MacintoshHD/Users/YOUR NAME/Applications/ Right click on The Sims 4.app and choose: Show Package Contents/Contents/Data/Shared/Worlds/Areas

Or if you have a custom installation, you have to find the folder that contains the game files.

3. Step – Pasting the MODS folder into Mods folder

The mods folder is located in your documents folder, not in the program files. Navigate to your PC > Documents > Electronic Arts > The Sims 4 > Mods folder.

(note: If you don't have these folders because you downloaded the Sims 4 recently, you have to start up the game first and it will automatically generate these folders)

Now, simply paste the contents from the extracted MODS folder into your Mods folder. That means you should see only two files:

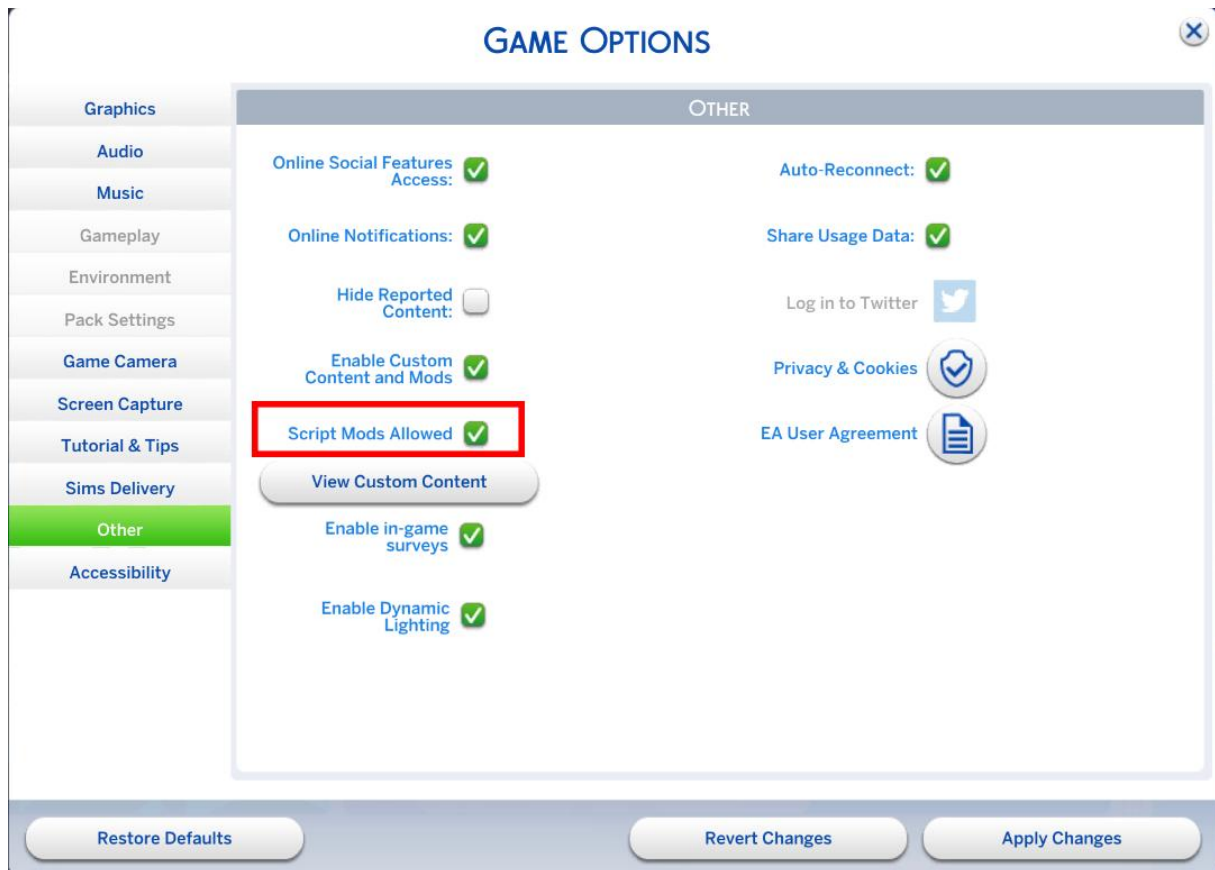

[NerdyDoll_GetTravelling_Aviadora.package](#)

[NerdyDoll_GetTravelling_Aviadora.script](#)

!! Do not put into other sub-folders as the mod contains a script file to enable traveling !!

4. Step – Script mods enabled

Start up your game and check whether script mods are enabled or not in Game Options -->>Other.

Apply changes and restart your game, if script mods were disabled beforehand!

And there you have it! You can now access Aviodora from any save file!

Depending on your computer and how many mods and custom content (CC) you have, you can expect a loading time of 1:05 to 2:30 minutes. Once the game loads, wait a few more seconds to ensure all objects are loaded correctly.

Updating the Mod – Step by Step Tutorial

0. Step – Delete Previous Mod Files from Mods Folder

From your Mods folder, delete the previous **NerdyDoll_GetTravelling_Aviadora.package** and **NerdyDoll_GetTravelling_Aviadora.script** files.

1. Step – ZIP Extraction

After downloading the new ZIP File, extract the contents to a desired place. That can be any folder you will find easily.

2. Step – Pasting the MODS folder into Mods folder

Just like during the initial installation, the mods folder is located in your documents folder, not in the program files. Navigate to your PC > Documents > Electronic Arts > The Sims 4 > Mods folder.

(note: If you don't have these folders because you downloaded the Sims 4 recently, you must start up the game first and it will automatically generate these folders)

Now, simply paste the extracted MODS folder into your Mods folder.!! **Do not put into other sub-folders as the mod contains a script file to enable traveling !!**

3. Step – Pasting the SO_DesertPark_01.World world file into the Saves folder

Paste the **modified SO_DesertPark_01.world** (found in the downloaded ZIP folder after extraction) into folder (The Sims 4\Data\Shared\Worlds\Areas) and override the existing world. If your PC does not allow it, you can also try to login through your administrator profile and do so that way.

4. Step – Script mods enabled + Starting Up Your Game

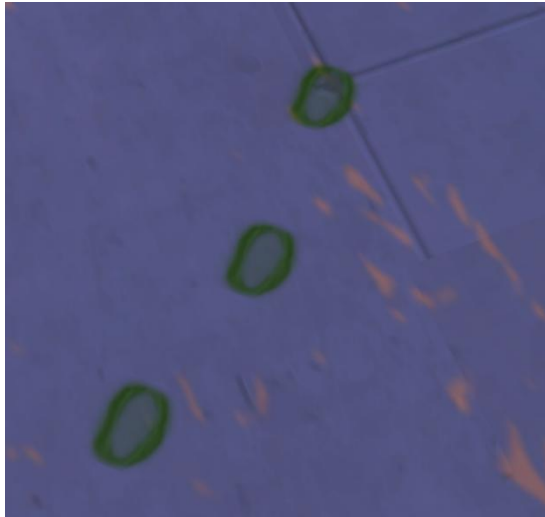

Again, make sure script mods are enabled in Game Options. If all went well, you should see the updated save file, called: Aviodora Beta testing V0.99 plus the updated thumbnail, which also indicated the mod version.

Optional Files

These files are optional as they affect other parts of the game as well. If you wish to use them, simply past them into your mods folder.

1. NerdyDoll_RemoveFootprint.package

- Removes the green footprint that follows a Sim in Aviodora but it also removes the effect from from all beaches.

2. NerdyDoll_NoPictureFrameBatuu_UI.package

- Removes the Batuu Frame from the Airline menu

3. NerdyDoll_WickedPhotos_18+.package

- Mostly for those that use *Wicked Whims*. When using the Starry Nights Woohoo building, your Sim may get a chance to buy steamy photos created during the woohoo session with WW. Heavily 18+ photos, not a child or streamer friendly add-on.

4. NerdyDoll_HolidayTradition_Lottery

- Sims can buy lottery tickets during the Surprise Holiday at the post office. Without this add-on the game won't recognize the interaction as completing the holiday. (Your Sims can still win the lottery though)

Uninstalling the Mod

Basically, you have to reverse the installation steps and you can successfully uninstall the mod. In Summary:

- Delete the **NerdyDoll_GetTravelling_Aviadora.package** and **NerdyDoll_GetTravelling_Aviadora.script** files from your Mods folder
- Copy the backed-up world file from your folder and replace the modified world file with the original one. Additionally, you can always repair the game and the world file will be automatically returned to default.

Note: Before playing with this mod, it is a good idea to back up your save files. While no issues should arise from this mod, it is always wise to have backed-up save files in case something goes wrong.

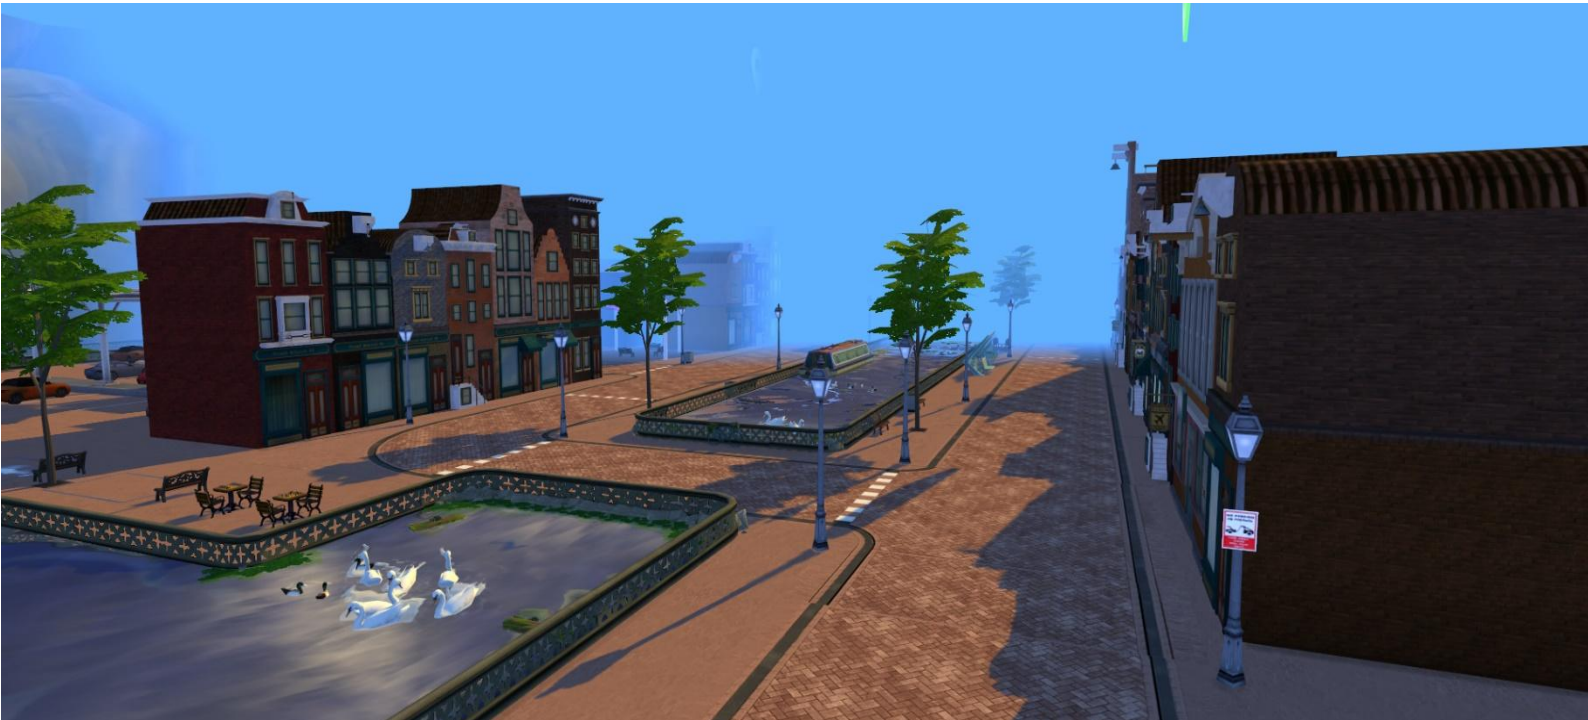

Troubleshooting

When I load into Aviodora it looks like the original Oasis Spring Park	Please double-check if you have the correct world-file installed. Check out step 2 in the installation process.
	Make sure your game is updated to the latest patch!

!! If you have additional troubles, please contact me, so I can give you personal help !!

Optimization

If you have a lower-end computer, it may be a good idea to lower the graphics settings. Some changes may require your game to be restarted to take effect. Additionally, without modifying some high-resolution settings, you can change the view distance from High to Low. This can double the fps rate in some areas but will also give you a noticeable blue highlight.

GAME OPTIONS

Graphics	DISPLAY	
Audio	Display Type: Fullscreen	Refresh Rate: 144
Music	Resolution: 1,920x1,080	Vertical Sync: ☐
Gameplay	GRAPHICS	
Environment	Graphics Quality: Custom	
Pack Settings	Sims: Very High	Edge Smoothing: High
Game Camera	Objects: High	3D Scene Resolution: High
Screen Capture	Lighting: Very High	View Distance: Low
Tutorial & Tips	Reflections: High	Uncompressed Sim Textures: High
Sims Delivery	Visual Effects: High	Post Processing Effects: ☐
Other		Laptop Mode: ☐
Accessibility		
Restore Defaults		
Revert Changes		
Apply Changes		

This setting won't require your game to be restarted, and you can easily switch back if you think your game and computer can handle the mod.

If you wish to see the frame rate per second (fps), you can do so by pressing Shift+Ctrl+C and typing in: fps on. The rate will appear on the bottom left-hand side.

Bug Report Forms:

Bug Report

Spelling Error Report

Gameplay Feedback

Performance Feedback

Missing Features

- **Bug Reports:** Report any bugs, missing pictures, glitches or Last Exception errors
- **Spelling Error Reports:** Report any spelling and grammatical errors you notice
- **Gameplay Feedback:** To gather general feedback on gameplay experience, including enjoyment, difficulty, and suggestions for improvement.
- **Performance Feedback:** To report on the mod's performance, including loading times, frame rate issues, last exception errors and crashes.
- **Missing Features Reports:** To identify any features or functionalities that testers feel is missing or could enhance the overall experience of Aviodora. This can be a notification, a buff, more explanation, interactions or anything you feel is missing from the mod.

If you have problems installing the mod, please do not fill in a bug report but contact me via social media and I'm more than happy to help.

Social Media

Feel free to share any screenshots, videos, or recordings of Aviodora. However, please do not give access to the mod's files, as it is in beta testing and only a few people can access it to avoid too many reports and requests.

In case the push buttons do not work, you can find my social media accounts here as well:
