

JUMP FUCKER

HOW TO PLAY

Welcome to Jump Fucker. There is a pretty girl at the top and you have to reach her.

Start the game by pressing "New Game" in the starting menu.

If at any point in the game you want to change the game settings press the menu button shown in the controls section at the end of the guide.

Your only way of moving up the platforms is to jump.

To do that press and hold the jump button or key and aim to the left or right using the analog stick or D- pad on your controller or if you are using a keyboard the arrow keys. The longer you hold the jump button the higher and farther you will jump.

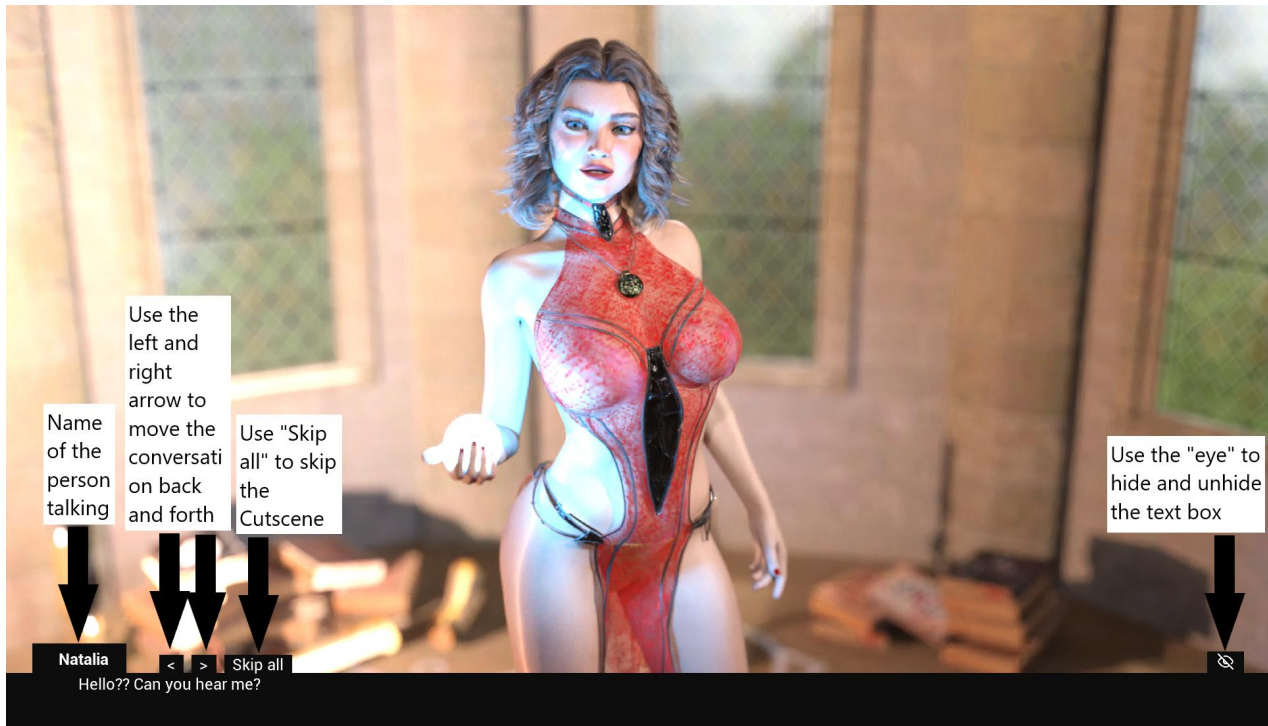

On your way up you will see some glowing crystals. Jump or walk into them to activate a short cutscene.

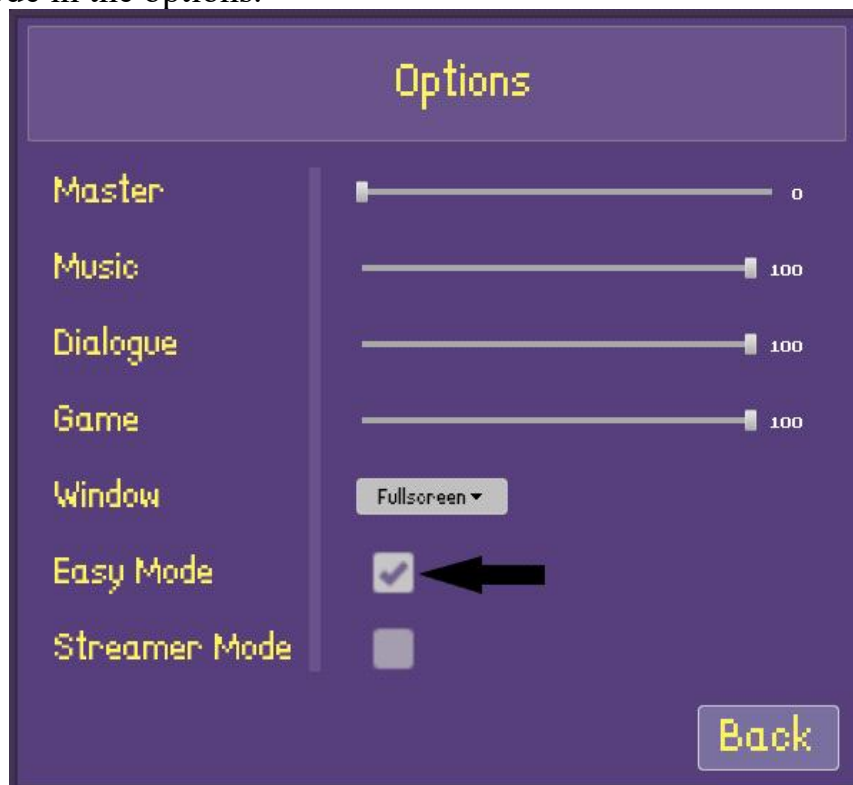

During that scene use your mouse to left-click on the different buttons above the text to move the conversation forward or backward, to skip the scene entirely and go back

to jumping or to hide the textbox and enjoy the full picture.

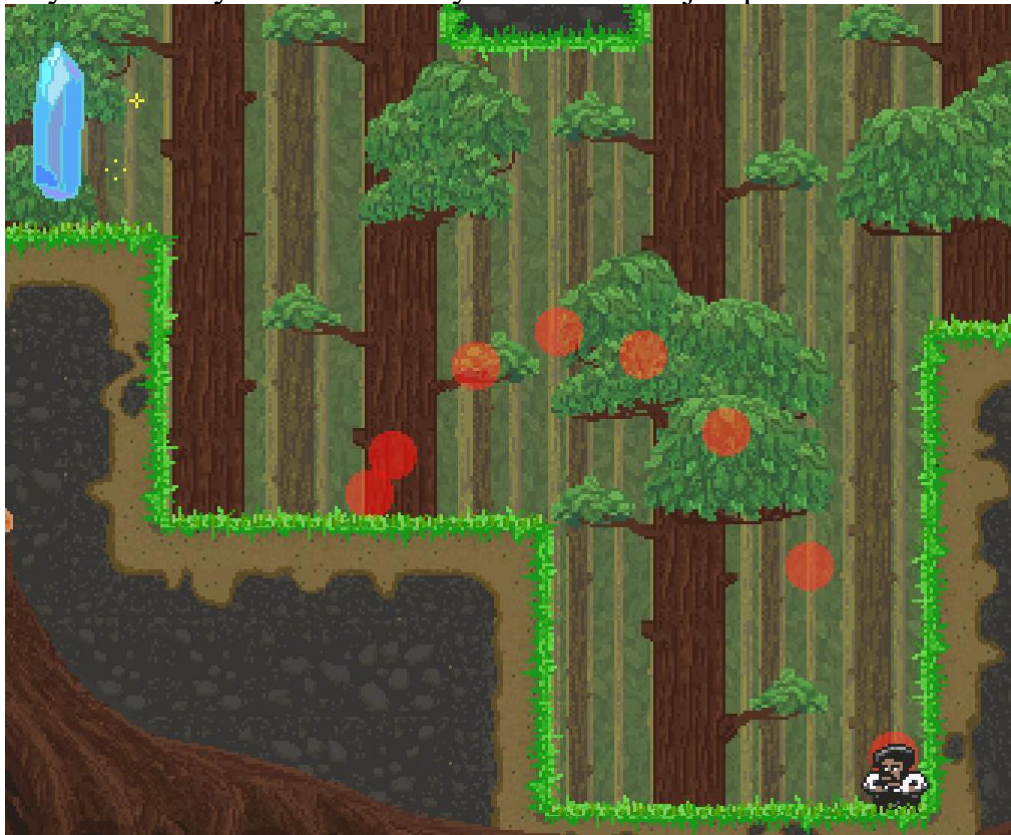

Try to get all the crystals on your way up as each of them progresses the story and collecting all of them offers you the true ending once you reach the top.

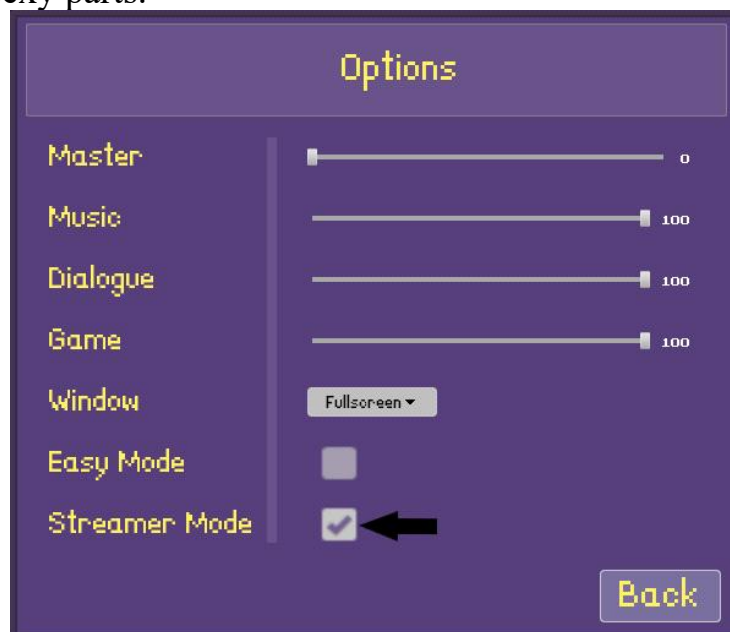

If you are having trouble getting past a certain part you might want to enable easy mode in the options.

Easy mode will show you a line while you are holding the jump button which shows you where you will land if you release the jump button.

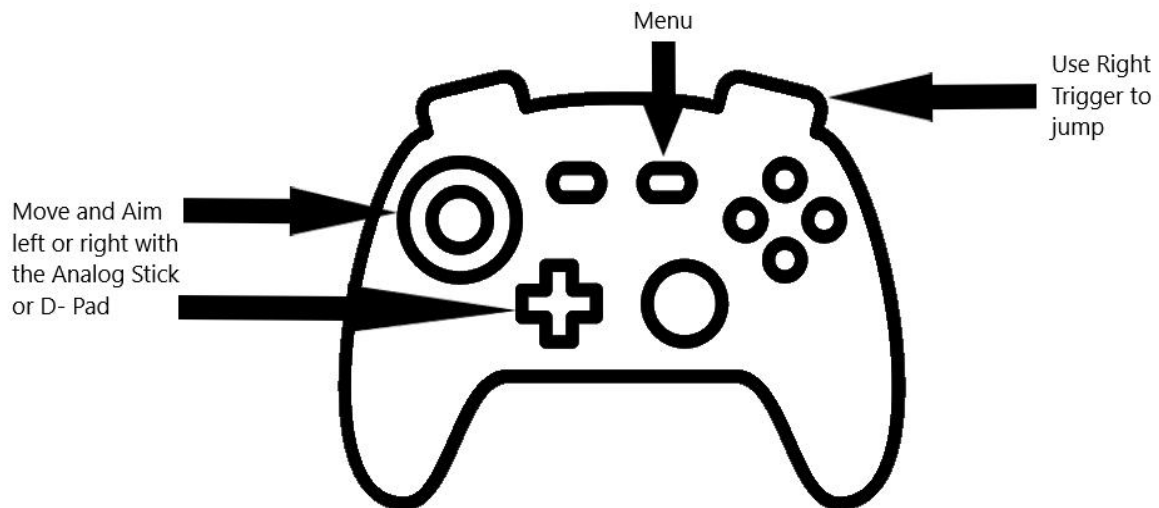

Should you want to stream the game there is a Streamer mode which pixelates the sexy parts.
