Writer's notes: In the near future, when the body and mind are just hardware and software, two enhanced humans celebrate an intimate anniversary.

This is an experiment, in that it uses a lot of kind of science fictiony premises, and I'm sort of afraid that they might make elements too abstract to function. I will let you be the judge. If you are interested in the script, but aren't interested in the sound effects, I think it should work fine without them. If you disagree, either hit me up for rewrites, or modify the script as you see fit. As a note, YouTube audio actually has a public domain audio library that offers some appropriate EDM for the music mentions.

(Sufficiently moody EDM music plays)

There you are. I wondered when you were going to get here.

The club's pretty packed tonight.

[Listener response]

No, I suppose you're right. I'm not wearing much.

I don't think you really mind though, do you?

I just wanted to show off one of my new mods, I guess.

And, I think you like the idea that everybody in here has their eyes on the hot little piece that's coming home with you tonight.

What do you think?

[Listener response]

[giggle]

About the mod, I mean.

I got them installed this morning while you were logged in, running that hack job. I figured you were so occupied, you wouldn't mind if I went out and prettied myself up for tonight. And you...

[Listener response]

Thank you! I think the under case lights are pretty too!

I love how they create that little glow
from between my skin plates and at my
joints, that just slowly drifts from color
to color, like I'm full of light, hidden
just under the surface.

And I can customise all of it!

See? Now it's Yellow? There's other stuff
too, I'll show you later.

[Listener response]

I guess maybe it's sort of like cheating
to get a second mod installed. I know I
was only supposed to surprise you with
one, but I thought you might like it, and
they are so pretty...

I got a few more mods in mind that you
might be interested in though... I can tell
you about them later? I know the lights
aren't really what you wanted to hear
about tonight... I know you're maybe
expecting something a bit more flashy...

Why don't we hit the dance floor while we
talk?

Everybody that's been eyeing me can watch
me grind up on you, and everybody else can
see my big, sleek, sexy cyborg. I can tell
by the way they are watching us, they wish
it was them, running their dark,
matte-finished hands all over my glowing
body.

[Just above a whisper]

Happy anniversary, Baby.

[kiss]

[Listener response]

I have to admit, I'm pretty excited to see what you picked out for tonight. The electrostims I got for your fingertips last year have come in really *handy*...

[giggle]

I'm so curious to see if you've figured out how to outdo that one.

If... I'm honest, my choice this year might have been a little selfish but I don't think you'll mind it.

So, you want to dance first, or... should we head over to the mod parlour?

[Listener response]

Mmm...Impatient?

I can feel how tight your grip on me is... I won't lie - it's pretty exciting, how you can't wait.

Alright Babe. A few quick tweaks, and I'll be all yours. See you in a bit...

[EDM fades out]

[sound of bodies hitting a door]

[passionate kissing sounds, little moans]

[Breathy]

Oh Baby wait...Let me get the door.

[electronic bleeps, door opening and closing]

[calming breath]

No.

No you don't get to look yet.

I know, I'm teasing you.
I bet you wanna know what I had the
modders sync to your biostats.
I know you can feel the difference down
there already...
But...
You don't get to look yet...
Not until the big reveal...
What did you get for me!?
You said it didn't involve any surgery or
rewiring?

[Listener response]

That little chip...

***[a little nervous mixed in with
excitement]***

Wetware? You want to... mod my brain?

[Listener response]

You know I trust you Babe.

I... just... don't...

You aren't going to mess with my
personality or anything like that... right?

[Listener response]

No, that was dumb... I know you wouldn't.

It's just... a whole new level of intimacy,
you know?

[deep breath]

Okay... yeah.

Can I take a look at it first?

[Listener response]

Let's see... there's a memory repository,
connector pins for the parietal, the
cerebellum, the thalamus, the occipital...

[nervous again]

[small shuddering breath]

...frontal and the brainstem?
Baby... this accesses every part of... well...
me.

Are... are you sure you-

[Listener response]

[Less nervous, a little conviction]

Yes. I do trust you.

[Listener response]

No. I want... you to do it.

Slot it in for me, Baby?

The third socket down is open... I've
unlocked it for you.

Mmmm... That's right...

slide your fingers down the back of my
neck and you'll feel it...

[click]

[shuddering gasp]

There...

[More install sounds]

I feel... a little funny... but that's I
think... just the data upload.

It's interfacing... very smoothly.

This... this is custom, isn't it?

[Listener response]

It's made just for me?

Babe...

[Kisses]

Okay, I guess it will take a few minutes
to fully integrate... and I don't want to
wait anymore. I'm too excited to show you
yours...

[rustling clothes]

I went with something a bit
more...physical.

Take your coat and shirt off for me, Baby...
I'm going to get down here and get to work
and take these pants off.

[Listener response]

Babe... Just... trust me?

[more rustling clothes]

[heavy breath]

Mmmmm... Hnnnnnnnn

[Clicking sounds, Changing out the cock]

And there. It. Is.

[giggle]

I guess it's kind of appropriate... hardware
for you, wetware for me.

What do you think Baby?! I did the 3d
modelling myself! I was really inspired by
how fired up and brutal you can get
sometimes...

[Listener response]

[giggle]

Yeah... it is big.

Really big.

You're going to have to be a little
careful with it, Babe

[giggle]

Oh gosh, no... I don't think I would let
anybody use a dildo that big on me... well...
maybe, you...

But, I think, attached to you? So you can
control it all the way down to the
smallest little throbs?

It's going to stretch me out juuust right.
The shape... the bumps and ridges... the way
you flex it... It really suits you, babe.
god I can't wait to get this thing inside
me...

But first... I think we should check to make sure all the sensors function.

I want to make sure you feel everything... when I take you in my mouth.

[sucking and slurping noises]

Mmm... I might have a tight jaw tomorrow...

but yeah...

I think this will work.

God, and you're hard as steel, Baby.

[giggle]

I made sure you would be.

[Listener response]

The other one?

[giggle]

It's still in my purse, from earlier. I'll put it in with the other dicks later after I wash it. I know we're kind of developing an arsenal of them, but you know how I like to play with all the new shapes... and I know you like what they do to me.

Now, if you'll excuse me...I've got an exciting new cock to suck.

[sucking and licking]

Feels good, doesn't it, Baby? I know where all the most sensitive parts are... after all, I designed them myself.

Using my hands and my mouth, I know just how to drive you crazy...

[impassioned sucking]

No no... no you don't... don't worry Baby.

I know you feel like you're getting close,
but I'm not going to stop working this
cock.

I know that as I jerk this massive member,
you feel like any second you're going to
blow a giant load all over my face.

Any second...

but you're not.

[Seductive, teasing]

See... I included something special in this
one...

It's an inhibitor.

You're going to feel the pleasure and
need, rise like you always do... and it's
going to go well beyond what you've
experienced before.

But you won't cum.

You're going to have to be stimulated a
looong time before you finally hit your
new tipping point.

...And when you get there...

Well... I'm told there's nothing else like
it. Intense, electric, explosive...

You're going to have to work very, very
hard to cum.

I could turn the feature on and off, though... With a thought even! I had a mode selector installed and a few other features as well.

The top tech for my man...

I can customise a bunch of your biosynth settings around it, wirelessly.

...but tonight, I'm not going to.

You're just going to have to get there using me.

[small, jolting breath]

I think the installation is complete... whatever you've decided to do to me, It's done.

So what now, Baby? What's going to happen to me?

[Listener response]

I'll see, huh?

[Listener response]

Oh... so commanding. I'll stand up. That's how you want it to be tonight, Baby?

[Pouty]

You gonna be my Daddy tonight? You want to control me, and make me do whatever you say?

[Listener response]

Something like that? Well... I'm looking forward to finding out what that means... Daddy.

[Listener response]

Daddy comes later? I... don't know what that means... but okay.

[protracted kissing sounds]

[moaning during kissing starts part way through]

Ohh...

[giggle]

... those electrostims really were a good choice last year. Fuck... and you really know how to use them. I can feel every centivolt you send coursing through my nerves... every subsonic vibration through my skin as your fingertips glide over me.

[gasp]

and when you grab me and pull me into you... I feel the ripples of sensation flow deep into my body.

Flesh, metal, it doesn't matter... the feeling is intoxicating.

Mmm... your grip is like steel.

[Listener response]

[giggle]

Sorry, you're right, diamond-laminated titanium... is more accurate.

[gasp]

Mmmm, let me change my light settings...

I'll set them to strobe with my heart beat. Mmmm really gently though. I kind of like the pastel rainbow sett-

[Flipping, moving sounds]

Oh I love it when you move me like that... spinning me around, like I'm a doll. The feeling of your chest against my back... naughty...

[giggle]

the new feeling of that new, big cock,
just above my ass.

You love letting your hands rove over me,
exploring the parts of me where flesh
meets plastic, ceramic, and chromed steel...

I couldn't get away from those unyielding
arms if I wanted to...

and I don't want to...

but it's exciting to know that it isn't up
to me.

Ha... the way you're reaching around and
mauling my breast, but still delicately
stroking sonic pulses into my nipple... that
big arm keeps me here, pressed into you
and takes pleasure from my body... while .x
still making sure to give just as much
back.

I can feel your other hand trailing,
tickling, and micro-shocking it's way down
over my stomach... down...

[breathy]

Down... mmm yes.

Oh... please... kiss my neck while you do
that.

Oh yes...

Your hand could crush steel, but you move
it so delicately and gently against my

pussy... oh... the strength of iron, and the
deftness of an artist...

I know you know how wet I am from you,
Baby... I can feel... you slide a finger
inside me to gather some of the wetness
for my clit...

You can do anything to me... I WANT you to...
oh fuck... but those

Fingers... they feel so good.

[breathy moaning for a few beats]

Baby... I'm so... I want you so bad right now...
I'm not going to last if you keep going...

[Listener response]

You... want me to cum like this?

I'm happy to... fuck... oblige... but don't you
want to... try your... new... oh god... oh... ohh...

[escalates to shuddering orgasm noises]

[Through deep breaths]

Take me to the bedroom Baby... please.

***[pause, soft thump of a body hitting the
bed]***

[kisses and moans]

Fuck Baby please... I need it.

[Listener response]

You know... what I want....

You want to hear me say it don't you

Your cock. I need your cock. I... I've been waiting for it all night... I want to feel it stretch me. I want to feel YOU stretch me. With your new, thick, hard dick...

[wet sound]

[shuddering gasp]

Oh... go slow... please. It's... filling me up... so much!

Ohh... it's... hitting all the spots I hoped it would. Oh fuck... it's a lot though... don't go all the way in yet.

Mmm... just another centimeter at a time... yes... back out and in a little deeper... fuck... fuuuuck...

[Heavy breathing]

God... maybe... maybe it's too... big... I...

[Pain yelp]

fuck... oh god.

You... got it all the way in.

Oh fuck... that fills me up so much!

Just... hold it there for a sec... god...

[breathy]

I'm so full... I'm sooo full... now...

Baby... what I want you to do... please... you got it in... a bit at a time and all the way back out... now... do... do the opposite... please?

I want you... to pull a little more out each time... and each time, I want you to push it all the way back in, deep... hard...

Yeah Baby... longer and longer... fuck it's so much... longer and longer... speed... speed up. I can't believe this feeling...

Fuck... I can feel it... pulling all the way out... I feel the edge of your head at my entrance... popping out...

[clenched teeth, almost growling]

and then sliding all the way back in...

[body slapping sound]

fuuuck!

[body slapping sounds start, begin speeding up.]

[Starting to really pant]

Faster Baby... faster.

Just like that... god...

I'm so wet for you... god

Baby... I need your fingers...

Put them on my clit while you fuck me, please?

Oh fuck... the electrostims... fuck I'm going to cum Baby! It's coming... fuck it's...!

[shuddering, powerful orgasm]

Oh god Babe... yeah... keep going...

I know you're feeling it...

[giggle]

You want to cum so bad by now, dont you...

Keep going...

[stutter glitch]

Hey!? why did you pull out?

You don't need to jerk it Baby... put it
back in me.

Please, I want... wait...

[growing alarm]

What's happening? I'm... my body is shaking.

My new case lights are all changing to
violet at the same time...

but

Wait... that's your signature thing - you
switch all the diodes in the system to
violet whenever you... hack into

[overwhelmed, frightened]

... oh... oh GOD! Are you...ha-hacking my
brain?

I feel so weak...I can't... I can't...

[Listener response]

... th-the chip... you... o-o-opened me... insta...
installed... a b-b-b-backdoor... into my
mind?? I... I don't have... not... not in
control... of...

[Listener response]

[shuddering breath calms a little]

Yes. Yes, I t-trust you.

More than anyone.

It... it's just... a little frightening. I've never... had someone... take control of me like this...

[Listener response]

Feel... feel what I... oh. oh! What's... what are you... what I'm feeling... it f-feels... am... am I cumming?

Am I cumming ag-g-gain?? Ah...

[intense orgasm noises and recovery]

That... I felt all that. Before.

[Listener response]

The chip...? Has an onboard memory...?

oh my god.

You... it... recorded the brain response during my orgasm?

Just the data of the physical sensations?

And replayed them...

It made me feel it all over again!?

[Listener response]

This is so much. I... I can't...

[surprised noises during kisses]

Babe...

Thank you...

[Listener response]

Yes? I remember that night...

Before we started dating? and I was t-trying to explain subspace to you...

[Listener response]

I s-said... sometimes...

[shiver]

What's happening? Are you... in... my...
memories...

[Totally conversational, relaxed]

[Passed memory]

Sometimes, when I get dominated... I just
want to completely turn off, you know?
Like... I don't want to think, I don't want
to decide, I just want to do what I'm
told, and feel.

And feel and feel and feel.

I just want to go totally blank - and
feral.

That's what subspace is like, to me.

[Back to shivering and shuddering]

I can feel it...

A-a-and you do that for me when we play
that way Baby, but...

[Listener response]

Y-you want... to get me there... but more?

Oh my god... that's... what this is about?

[Listener response]

N... no. No... I don't want to stop.

[Listener response]

Y-yes. I trust you.

[Listener response]

Yes... I... I love you.

***[Pause, insert background cyborg whirls
and breathing]***

Yes... I remember our word... for safety...

Hmmm

[giggle]

No, you would never stop me from saying it
if I need to...

[Listener response]

[Kiss]

I will be good... master.

[Listener response]

[Kiss then shifting position]

Y-y-yes master... it was... it was very
naughty of me to give you that great...
great big cock... and make you have to work
harder to cum with it.

What are you... what are you going to do to-

[Listener response, Spank]

Punish me?

My... sensitivity? I don't understand.

How can you... change my...

Oh fuck what's happening?

Everything... I feel... everything.

My skin... you're...

Just the recycling of the air feels like
tendrils all over me... caressing me...

[Sheet rustle/ writhe]

The bedsheets... they... they hurt! They're so
rough. The air feels so good, but the bed...
it stings so bad!

Ah I can't! I can't hold still but when I move... Ahahh... ahhh...

No! AHH! No please...please don't touch!
It's like fire!

Okay mas... yes master, I'll open my legs.

Oh fuck, but that exposes m-my
pu-pu-puss...Oh Master don't blow on it
please wait-

[crying out in maybe pleasure, maybe pain]

Oh god master, please...

Wait... I feel...

oh god you're going to replay the orgasm
again...

You fucking asshole...

Oh god babe I can feel it coming again

wait don't dont blow on my-

***[shuddering, screaming orgasm, descending
into emotional sobbing]***

[Listener response]

[Still sobbing]

Yes master... I... I see what you c-can do to
me... whenever you want to... ohh the sense...

[sobbing eases]

Sensitivity...

Thank you for bringing it down, babe.

[spank and yelp of pain]

Thank you master -

[slapping noise, sharp little cry]

Master... please... your cock is so big now...
it stings a little when you slap it on my
clit. I'm so sensitive...

[Listener response]

I-it's my fault Master... it's my fault your
cock is so-

[slapping sound, sharp cry, wet sound]

B... B... Ohh god... y-you're pushing back in...
ahhh... all the way!

Wait...

[Panic]

I can't...I can't move? I-

[Listener response]

You won't let me move?

You won't... let me move?

[Listener response]

What do you mean I'll move? I can't...

wait...

my hips... I'm arcing them up to you... my
arms are spreading out against the bed...
you're moving me... controlling me... like a
puppet.

[slapping of bodies, continuous]

You're speeding up... fuck you're making me
open my legs and raise my hips... putting me
at that angle, you... so deep... you fuck me...
and

you're... oh god... you're pounding into me
Master!

Ahhhh, the electrostims! You're... you're running them... all over me again... you have them cranked up so... s-so much! It's... so much... it's too much...

[Listener response]

Master... I'm... I think I'm going to cum again... fuck...

Wait...

I feel...

the replay too?!

How is... how can you... at the same time... oh GOD

[totally out of control orgasm noises]

[Listener response]

[panting, quivering]

L... loop? Y-y-you're going to p-put the replay on... loop while you fuck me?

Oh fuck... oh what's my hand... why is it... why am I...

[overwhelmed sobbing]

I'm rubbing my clit... you're making me rub my clit... while... you... oh god I'm coming agaa... haah...

[more orgasm noises, ragged and overstimulated]

Mas... Master... it's so much... I can't... I have no control. No stopping... too much...

[through clenched teeth]

cumming... cummmminnnng againnnn...

[overstimulated, quivering orgasm]

[Disoriented, overstimulated]

Baby... Master... Master... Babe... Baby... touch...
fuck... can't... think... can't... ag... agai... cum
again...

[groaning, exhausted orgasm]

***[Period of mewling, animalistic grunts,
groans, and sighs, totally overstimulated
and incoherent, rising and falling as
though sensation increases and decreases
over time]***

Master... speeding... hard... too hard... babe... I...
cumming? Cum... Mmm... Mmmaa... master...

Cum Master! Yes! Cum! Cum master! Cum ma...
Cum babe, cum... baaahah... ahhh...

***[Slapping body noises stop, Final few,
long, drawn out groans
Nothing but ragged, slowing breaths for a
number of beats]***

B..Babe...

[Listener response]

No...I'm okay. I've just never...

[Listener response]

I know.

[kisses]

It... it was frightening... but I knew you
would never do anything to... who I am.

[Listener response]

It was just... a surprise.

It was wonderful.

[more kisses I wanna smooch]

I'm just... coming down and...

[ragged breath]

[Listener response]

It was special. Really really special...

Mmm... the nice thing about those
electrostims - they make for excellent
relaxing deep tissue massages...

[giggle]

in addition to sexy time deep tissue
massages.

When you... took complete control... I think
I... you... my body was so tense... holding
pretty tight, you know?

I feel so relaxed now...

[Listener response]

No. Don't you dare take the chip out.

I wouldn't want to live without doing more
things like that... it was too fun...

I like being in your hands, completely.
Under your control... all yours...

Just... hold me for right now, okay, babe?

[Listener response]

[Kisses and moans]

Happy anniversary, Baby... I love you, so
much...

[Kisses and snuggle sounds]
