Rules!

1. Words can be written in any direction:
 - ❖ Left-right or right-left;
 - ❖ Top-down or bottom-up;
 - ❖ Any diagonal direction.
2. Clues are written so that answers appear in alphabetical order, moving from 1 to 20.
3. Some clues reference other clues; in a clue containing “#9”, for example, you need to replace “#9” with the answer to question 9 in order to complete the clue.
4. Some of these references are recursive... and that, in and of itself, can be a clue!

Grid Description

The grid is arranged in a diamond shape over thirty-nine lines. Line 1 has one letter in the centre of the line, line 2 has three letters with the middle letter directly under the letter in line 1. This pattern continues until line 20, at which point the number of letters starts to contract symmetrically with the top half until we get to line 39, which has just one central letter again.
